DEPARTMENT OF REVENUE

**2018 REPORTS AND OPINIONS
OF THE PROPERTY TAX ADMINISTRATOR**

CUSTER COUNTY

Pete Ricketts, Governor

April 6, 2018

Commissioner Keetle:

The Property Tax Administrator has compiled the 2018 Reports and Opinions of the Property Tax Administrator for Custer County pursuant to [Neb. Rev. Stat. § 77-5027](#). This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Custer County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to [Neb. Rev. Stat. § 77-1514](#).

For the Tax Commissioner

Sincerely,

A handwritten signature in black ink that reads "Ruth A. Sorensen".

Ruth A. Sorensen
Property Tax Administrator
402-471-5962

cc: Connie Braithwaite, Custer County Assessor

- Agricultural Land Correlation
- PTA's Opinion

Appendices:

- Commission Summary

Statistical Reports and Displays:

- Residential Statistics
- Commercial Statistics
- Chart of Net Sales Compared to Commercial Assessed Value
- Agricultural Land Statistics
- Table-Average Value of Land Capability Groups
- Special Valuation Statistics (if applicable)

- Market Area Map
- Valuation History Charts

County Reports:

- County Abstract of Assessment for Real Property, Form 45
- County Abstract of Assessment for Real Property Compared to the Prior Year
- Certificate of Taxes Levied (CTL).
- Assessor Survey
- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

Introduction

[Neb. Rev. Stat. § 77-5027](#) provides that the Property Tax Administrator (PTA) shall prepare and deliver an annual Reports and Opinions (R&O) document to each county and to the Tax Equalization and Review Commission (Commission). This will contain statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property within each county. In addition to an opinion of the level of value and quality of assessment in the county, the PTA may make nonbinding recommendations for subclass adjustments for consideration by the Commission.

The statistical and narrative reports contained in the R&O of the PTA provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county is a conclusion based upon all the data provided by the county assessor and gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all arm's-length transactions as required by [Neb. Rev. Stat. § 77-1327](#). From this sales file, the Division prepares a statistical analysis comparing assessments to sale prices. After analyzing all available information to determine that the sales represent the class or subclass of properties being measured, inferences are drawn regarding the assessment level and quality of assessment of the class or subclass being evaluated. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure professionally accepted mass appraisal methods are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions on both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level—however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations.

Statistical Analysis:

In determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable level. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based on the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed value against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios the mean ratio has limited application in the analysis of the level of value because it assumes a normal distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average deviation from the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The Division primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist.

Pursuant to [Section 77-5023](#), the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska Statutes do not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

| General Property Class | Jurisdiction Size/Profile/Market Activity | COD Range |
|--|---|-------------|
| Residential improved (single family dwellings, condominiums, manuf. housing, 2-4 family units) | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 10.0 |
| | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 15.0 |
| | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 20.0 |
| Income-producing properties (commercial, industrial, apartments,) | Very large jurisdictions/densely populated/newer properties/active markets | 5.0 to 15.0 |
| | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 20.0 |
| | Rural or small jurisdictions/older properties/depressed market areas | 5.0 to 25.0 |
| Residential vacant land | Very large jurisdictions/rapid development/active markets | 5.0 to 15.0 |
| | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 20.0 |
| | Rural or small jurisdictions/little development/depressed markets | 5.0 to 25.0 |
| Other (non-agricultural) vacant land | Very large jurisdictions/rapid development/active markets | 5.0 to 20.0 |
| | Large to mid-sized jurisdictions/slower development/less active markets | 5.0 to 25.0 |
| | Rural or small jurisdictions/little development/depressed markets | 5.0 to 30.0 |

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The reliability of the COD can be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity.

Analysis of Assessment Practices:

The Division reviews assessment practices that ultimately affect the valuation of real property in each county. This review is done to ensure the reliability of the statistical analysis and to ensure professionally accepted mass appraisal methods are used in the county assessor's effort to establish uniform and proportionate valuations. The review of assessment practices is based on information filed from county assessors in the form of the Assessment Practices Survey, and in observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to Section 77-1327, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales

file allows analysis of up-to-date information. The county's sales verification and qualification procedures are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Valuation groupings and market areas are also examined to identify whether the groupings and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county's six-year inspection and review cycle is documented to ensure compliance with [Neb. Rev. Stat. § 77-1311.03](#) and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with professionally accepted mass appraisal methods. Methods and sales used to develop lot values are also reviewed to ensure the land component of the valuation process is based on the local market, and agricultural outbuildings and sites are reviewed as well.

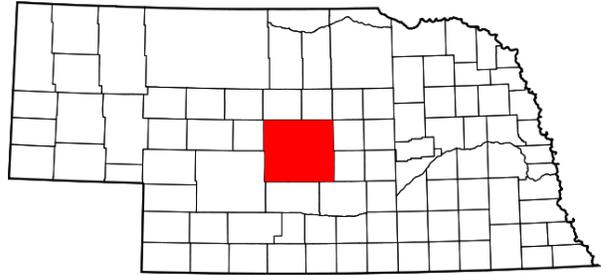

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for the end users, and highlight potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and practices are reviewed to ensure taxpayers are served with such transparency.

The comprehensive review of assessment practices is conducted throughout the year. When practical, potential issues identified are presented to the county assessor for clarification. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality is either compliant or not compliant with professionally accepted mass appraisal methods is based on the totality of the assessment practices in the county.

**Further information may be found in Exhibit 94*

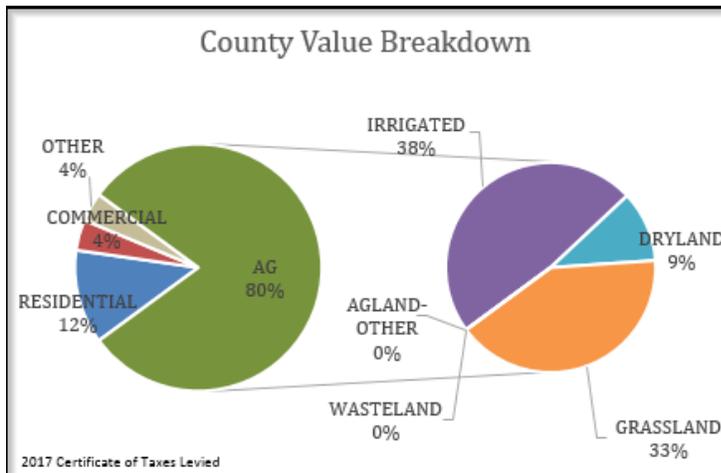

County Overview

With a total area of 2,576 miles, Custer County had 10,807 residents, per the Census Bureau Quick Facts for 2016, a slight population decline from the 2010 U.S. Census. Reports indicated that 72% of county residents were homeowners and 87% of residents occupied the same residence as in the prior year (Census Quick Facts).

The majority of the commercial properties in Custer County are located in and around Broken Bow, the county seat. According to the latest information available from the U.S. Census

Bureau, there were 397 employer establishments with total employment of 2,952.

Agricultural land is the main contributor to the valuation base. Grassland makes up a majority of the land in the county. Custer County is included in both the Central Platte and Lower Loup Natural Resources Districts (NRD). When compared against the top crops of the other counties in Nebraska, Custer County ranks first in corn for grain. In value of sales by commodity group, Custer County ranks third in grains, and fourth in cattle and calves (USDA AgCensus).

| CITY POPULATION CHANGE | | | |
|-------------------------------|-------------|-------------|---------------|
| | 2007 | 2017 | Change |
| ANSELMO | 159 | 145 | -8.8% |
| ANSLEY | 520 | 441 | -15.2% |
| ARNOLD | 630 | 597 | -5.2% |
| BERWYN | 134 | 83 | -38.1% |
| BROKEN BOW | 3,503 | 3,559 | 1.6% |
| CALLAWAY | 637 | 574 | -9.9% |
| COMSTOCK | 110 | 93 | -15.5% |
| MASON CITY | 178 | 171 | -3.9% |
| MERNA | 391 | 363 | -7.2% |
| OCONTO | 141 | 151 | 7.1% |
| SARGENT | 649 | 525 | -19.1% |

2018 Residential Correlation for Custer County

Assessment Actions

Residential properties in Broken Bow and the Village of Berwyn were reviewed with on-site inspections by the county assessor’s office, as were the improvements in four rural townships including Broken Bow Township, Berwyn, East Custer, and Elk Creek. In Custer County, improvements are reappraised in the same year the inspection work is completed. Cost tables and depreciation tables are updated, as are land values if needed. Lot models were not adjusted in Broken Bow this year, because they were updated for the 2017 assessment year. For the remainder of the residential class, only routine maintenance was completed.

Description of Analysis

Custer County’s residential market has six economically unique markets, based on local amenities including school systems and proximity to Broken Bow, or other large towns with employment opportunities.

| Valuation Group | Description |
|------------------------|--|
| 1 | Broken Bow |
| 2 | Callaway |
| 3 | Ansley, Arnold & Merna |
| 4 | Anselmo, Mason City, Oconto, & Sargent |
| 5 | Berwyn & Comstock |
| 6 | Rural |

Analysis of the statistical profile indicates that the median and weighted mean are nearly identical, while the mean is above the range. The qualitative statistics are also quite high. The county has a number of low-dollar sales affecting the mean and the qualitative statistics, as those low-dollar sales are removed, all three measures improve while the median is minimally impacted. This analysis supports the use of the median as a reliable indicator of the level of value within the class.

| SALE PRICE * | | | | | | | |
|----------------------------|--------|--------------|---------------|-------------|-----------------|------------|------------|
| RANGE | | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| <u>Low \$ Ranges</u> | | | | | | | |
| Less Than | 5,000 | 10 | 197.24 | 283.48 | 237.59 | 89.68 | 119.31 |
| Less Than | 15,000 | 35 | 146.70 | 201.20 | 173.82 | 67.14 | 115.75 |
| Less Than | 30,000 | 68 | 118.30 | 161.97 | 133.79 | 58.28 | 121.06 |
| <u>Ranges Excl. Low \$</u> | | | | | | | |
| Greater Than | 4,999 | 283 | 97.16 | 106.35 | 95.89 | 22.22 | 110.91 |
| Greater Than | 14,999 | 258 | 96.53 | 100.35 | 95.22 | 16.97 | 105.39 |
| Greater Than | 29,999 | 225 | 96.01 | 97.41 | 94.54 | 13.97 | 103.04 |

The majority of valuation work occurred within the City of Broken Bow this year. Review of the sales file and the County’s Abstract of Assessment, Form 45 Compared to the CTL indicate that the property value affected the sales file and the county population similarly.

2018 Residential Correlation for Custer County

Review of the valuation groups outside of Broken Bow indicated that Valuation Group 5 did not contain a large enough sample to measure the level of value. Valuation Group 5 represents the smallest villages in the county, which were both inspected and revalued in 2017 and 2018.

Valuation Groups 2, 3, and 6 are within the range, but Valuation Group 2 and 3 have COD and PRDs that are somewhat above the range. Valuation Group 2 has one extreme low-dollar sale affecting the COD, PRD, and median by nearly 20 percentage points. These valuation groups represent villages with populations of 350-600 residents, and the amount of dispersion in these samples is typical for small towns markets. All four of the villages represented in Valuation Groups 2 and 3 have increased at an annualized rate of four to five percent per year over the past decade, which is just slightly lower than residential parcels in Broken Bow have increased, supporting that assessments have kept up with the market.

Valuation Group 4 is slightly above the range at 101%, with a COD of 62%. As low-dollar sales are removed from the sample, the qualitative measures improve and the median stabilizes around 98-99%, supporting that this valuation group is assessed near the upper end of the acceptable range. A statistical profile of this valuation group is included in the appendices of this report. Based on the analysis, all residential improvements are assessed within the acceptable range.

Assessment Practice Review

For the residential class, the Division's annual assessment practices review focuses on how sales data is submitted and qualified in the state sales file, a comparison of sold and unsold properties is done to ensure values are uniformly distributed, and a review of all aspects of the valuation process is also completed.

Custer County has a history of accurately submitting sales data in a timely manner to the state sales file. Sale utilization rates have improved over the past four years and have stabilized at about 70%. Review of the sales indicated that the county typically does not complete sale verification until late in the assessment process. Earlier review of sales data would provide the county and the Division with a cleaner preliminary review of statistical measures; however, ultimately the sales used for the measurement of the class represented an unbiased sample of arm's-length sales. The Division will work with the county assessor to ensure an earlier sales verification process.

Comparison of valuation changes on sold and unsold properties within the residential class supports that the values were uniformly established in 2017. The county complies with the physical inspection and review requirements, and just completed a review cycle that began in 2013. All residential parcels are reviewed on-site by the part-time lister. Cost, depreciation, and land value tables are all updated at the time of the physical inspection.

Review of the valuation group utilized within the class supported that properties have been adequately grouped based on general economic characteristics. The valuation groups are structured based on characteristics that impact the housing market including employment opportunities, local amenities, including medical facilities, and school systems.

2018 Residential Correlation for Custer County

Equalization and Quality of Assessment

Based on the statistical analysis, along with all other information available, and the review of assessment practices, all valuation groups have been assessed at an acceptable level. As described, the median in Valuation Group 4 is impacted by low-dollar outliers. The county complies with generally accepted mass appraisal standards.

| VALUATION GROUPING | | | | | | |
|--------------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 01 | 128 | 97.33 | 104.57 | 99.18 | 12.02 | 105.43 |
| 02 | 25 | 99.17 | 136.89 | 95.47 | 55.88 | 143.39 |
| 03 | 57 | 93.49 | 102.61 | 85.03 | 32.90 | 120.68 |
| 04 | 43 | 100.78 | 143.82 | 98.47 | 62.33 | 146.05 |
| 05 | 5 | 105.43 | 104.34 | 100.19 | 10.40 | 104.14 |
| 06 | 35 | 96.60 | 102.02 | 96.10 | 19.24 | 106.16 |
| ____ALL____ | 293 | 97.39 | 112.39 | 96.03 | 28.31 | 117.04 |

Level of Value

Based on the review of all available information, the level of value of residential property in Custer County is 97%.

2018 Commercial Correlation for Custer County

Assessment Actions

Stanard Appraisal was hired to complete the commercial reappraisal for the current assessment year of villages and rural commercial parcels. The reappraisal consisted of on-site inspections of the commercial property. Land valuations were updated in the Village of Ansley. All improvement values were updated. Within Broken Bow, only routine maintenance was completed.

Description of Analysis

There are five valuation groups to classify the commercial properties located within Custer County. The vast majority of commercial activity congregates in or around Broken Bow. The villages are grouped based on similar economic characteristics.

| Valuation Group | Description |
|-----------------|-----------------------------------|
| 1 | Broken Bow |
| 2 | Arnold, Merna |
| 3 | Callaway, Ansley |
| 4 | Mason City, Sargent |
| 5 | Anselmo, Berwyn, Comstock, Oconto |

Overall, commercial property in Custer County is valued at an acceptable level. The median and weighted mean correlate closely and are stable as outliers are removed. The mean, COD, and PRD are all heavily impacted by low-dollar sales. The removal of low-dollar sales does not significantly affect the median, but does improve the qualitative statistics.

| SALE PRICE * | | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
|----------------------------|--------|-------|--------|--------|----------|-------|--------|
| RANGE | | | | | | | |
| <u>Low \$ Ranges</u> | | | | | | | |
| Less Than | 5,000 | 2 | 264.70 | 264.70 | 264.49 | 00.11 | 100.08 |
| Less Than | 15,000 | 7 | 171.04 | 218.69 | 177.08 | 55.43 | 123.50 |
| Less Than | 30,000 | 18 | 110.49 | 155.28 | 124.16 | 51.89 | 125.06 |
| <u>Ranges Excl. Low \$</u> | | | | | | | |
| Greater Than | 4,999 | 52 | 97.79 | 114.98 | 98.17 | 28.12 | 117.12 |
| Greater Than | 14,999 | 47 | 97.20 | 105.90 | 97.63 | 19.93 | 108.47 |
| Greater Than | 29,999 | 36 | 96.06 | 103.14 | 96.86 | 19.55 | 106.48 |

The County Abstract of Assessment for Real Property, Form 45 Compared with the 2017 CTL indicates that the commercial class increased about 7%. These numbers are heavily impacted by three tax increment financing (TIF) projects that were paid off and placed on the tax rolls this year. When these figures are removed, the county abstract increased about 3%, excluding growth, because of the reappraisal work. The 3% change correlates well to the amount of change in sales within the statistical sample, supporting that assessments are uniform within the class.

2018 Commercial Correlation for Custer County

No valuation groups, outside of Valuation Group 1, contains a sufficient sample of sales. Valuation Group 3 contained the largest sample with ten sales, and a median of 131%. Outliers in the small sample have a profound effect on the statistics. Removal of a single ratio on either side of the median shifts the midpoint as much as twenty percentage points, showing the unreliability and volatility of these sales. Although there are insufficient sales in all the small valuation groups, examination of changes over a ten-year period does display logical results, with the smallest villages increasing at a rate of 1-2% per year, while the mid-size villages of increased 3-5% per year, with Broken Bow increasing at rate of 7% per year. Based on the review of all available information, commercial assessments are within the acceptable range.

Assessment Practice Review

In the commercial class, the Division's annual assessment practice review is focused on the qualification of sales, analysis to ensure sold and unsold parcels are similarly appraised, as well as a review of all aspects of the valuation process.

In the commercial class, the county's utilization of sales has improved in recent years, and stabilized at about 55%. Review of sales information indicated that the county does not complete the sales qualification process until late in the assessment year. Earlier verification would enhance both the county and the Division's ability to analyze preliminary statistics earlier in the year; ultimately, only arm's-length sales were used for the measurement of commercial property.

Review of inspection history indicates the county complies with cyclical review requirements. Inspection work is typically done by the contracted appraiser, but in recent years, the county staff has participated in the review process as well. The on-site inspections include interior reviews and interviews with the property owners where permitted. Land and improvement values are updated at time of inspection. The Division's review of sold and unsold properties supported the value was uniformly applied to both sold and unsold parcels.

The final aspect of review includes analyzing the valuation groups to ensure they represent areas that are defined by common economic factors. The county groups property based on the economic influences including the number of active businesses, and the demand for commercial property.

Equalization and Quality of Assessment

Only Broken Bow contains a sufficient sample of sales; however, the analysis supports that assessments of the commercial property are within the acceptable range. The county complies with generally accepted mass appraisal standards.

2018 Commercial Correlation for Custer County

| VALUATION GROUPING | | | | | | |
|--------------------|-------|--------|--------|----------|-------|--------|
| RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
| 01 | 29 | 95.85 | 104.67 | 98.78 | 22.36 | 108.15 |
| 02 | 8 | 99.16 | 152.64 | 111.46 | 56.06 | 136.95 |
| 03 | 10 | 131.28 | 137.10 | 104.43 | 32.82 | 131.28 |
| 04 | 5 | 104.32 | 104.23 | 106.63 | 09.14 | 97.75 |
| 05 | 2 | 179.86 | 179.86 | 101.02 | 47.34 | 178.04 |
| ____ALL____ | 54 | 98.03 | 120.52 | 98.29 | 33.32 | 122.62 |

Level of Value

Based on the review of all available information, the level of value of commercial property in Custer County is determined to be 98% of market value.

2018 Agricultural Correlation for Custer County

Assessor Actions

Physical inspection of agricultural improvements was completed in four townships. These include Broken Bow, Berwyn, East Custer, and Elk Creek Townships. Cost and depreciation tables are updated at the time of the physical review. Only routine maintenance was completed in the rest of the county.

A sales study of vacant land was completed and the county assessor decreased irrigated land in Market Area 1 by 5% and left all other values unchanged.

Description of Analysis

Custer County uses four different market areas based on geographic characteristics. The actions taken by the county assessor for the current assessment year parallel the general movement of the market in this region of the state, which has been flat to slightly declining. The resulting values are comparable to all adjoining counties. Review of the statistical profile indicates an acceptable level of value for agricultural property in the county. The coefficient of dispersion (COD) is slightly high, but is reflective of the declining agricultural market in the three-year study period.

| DATE OF SALE * RANGE | COUNT | MEDIAN | MEAN | WGT.MEAN | COD | PRD |
|-------------------------|-------|--------|-------|----------|-------|--------|
| <u>Study Yrs</u> | | | | | | |
| 01-OCT-14 To 30-SEP-15 | 17 | 61.58 | 74.74 | 72.65 | 30.43 | 102.88 |
| 01-OCT-15 To 30-SEP-16 | 17 | 70.34 | 75.09 | 65.76 | 20.23 | 114.19 |
| 01-OCT-16 To 30-SEP-17 | 9 | 88.28 | 89.04 | 84.61 | 16.50 | 105.24 |

Only Market Areas 1 and 5 contain a sufficient number of sales, and both are within the acceptable range. Review of the statistics by majority land use indicate that most of them do not have a sufficient number of sales. The large group is Market Area 1 grassland with 11 sales that is slightly outside the acceptable range. These sales are heavily weighted toward the oldest year of the study period; only three of the sales have occurred in the two newer years; all three sales are within or above the acceptable range. A statistical profile of these grassland sales can be found in the appendices of this report. Custer County's grassland value are lower than the adjoining counties; however, this relationship has been the trend for a number of years. None of the adjoining counties increased grassland values this year; Buffalo County decreased grassland values by 10%. Based on the analysis and the current trend in the agricultural market, all agricultural land in the county is assessed within the acceptable range.

Assessment Practice Review

Within the agricultural class, the Division's annual assessment practice review focuses on sales qualification, classification, and valuation of agricultural lands including the use of market areas, and the assessment of agricultural homes and outbuildings.

2018 Agricultural Correlation for Custer County

The county has a history of utilizing approximately 50-55% of agricultural land sales yearly; this amount is typical for the agricultural class. Review of the data indicates that sales are qualified without a bias, and that all sales with known special factors were removed per Directive 16-3.

The county inspects agricultural improvements in conjunction with rural residential properties; all properties have been inspected within the past five assessment years. At the time of a review, cost and depreciation tables are updated on the properties. The county utilizes Marshall & Swift costing for all outbuildings. Farm home sites are valued the same as rural residential home sites and farm homes are depreciated using the same tables that rural residential properties use.

All rural land is periodically reviewed for land use; the county will closely examine parcels less than 30 acres that are not in common use with adjoining properties for agricultural use. If the primary use of the land is not agricultural, the property is typically classified and valued as rural residential land. The county has five market areas drawn based on soil type and topography, but for a number of years, Market Areas 4 and 5 have been valued using the same schedule of values. In the Division's analysis, these areas have been consolidated for measurement purposes. The county and the Division annually study the market to determine the validity of the agricultural market areas; to date no changes appear to be warranted.

Equalization and Quality of Assessment

Agricultural outbuildings are valued using transparent valuation methodologies and are updated within the six-year appraisal cycle. Agricultural homes are valued the same as rural residential homes, which have been measured to be within the acceptable range.

Where there are sufficient samples of sales, the statistics support that the county has achieved agricultural land assessments within the acceptable range. The county's adjustment was consistent with the market and resulted in values that are equalized both within the county and with adjoining comparable counties. The county complies with generally accepted mass appraisal standards.

2018 Agricultural Correlation for Custer County

Level of Value

Based on the review of all available information, the level of value of agricultural property in Custer County is 72%.

2018 Opinions of the Property Tax Administrator for Custer County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (Cum. Supp. 2016). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Class | Level of Value | Quality of Assessment | Non-binding recommendation |
|----------------------------------|----------------|--|----------------------------|
| Residential Real Property | 97 | Meets generally accepted mass appraisal practices. | No recommendation. |
| | | | |
| Commercial Real Property | 98 | Meets generally accepted mass appraisal practices. | No recommendation. |
| | | | |
| Agricultural Land | 72 | Meets generally accepted mass appraisal practices. | No recommendation. |
| | | | |

***A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.*

Dated this 6th day of April, 2018.

What IF

Legend

- County Lines
- Market Areas
- Geo Codes
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Moderately well drained silty soils with clayey subsoils on uplands
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Excessively drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Lakes and Ponds
- Irrigation Wells

2018 Assessment Survey for Custer County

A. Staffing and Funding Information

| | |
|------------|--|
| 1. | Deputy(ies) on staff: |
| | 1 |
| 2. | Appraiser(s) on staff: |
| | 0 |
| 3. | Other full-time employees: |
| | 3 |
| 4. | Other part-time employees: |
| | 1 part-time lister |
| 5. | Number of shared employees: |
| | 1 |
| 6. | Assessor's requested budget for current fiscal year: |
| | \$195,610 |
| 7. | Adopted budget, or granted budget if different from above: |
| | \$198,550 |
| 8. | Amount of the total assessor's budget set aside for appraisal work: |
| | n/a |
| 9. | If appraisal/reappraisal budget is a separate levied fund, what is that amount: |
| | \$64,600 |
| 10. | Part of the assessor's budget that is dedicated to the computer system: |
| | \$12,800 for the GIS System; the clerk controls a budget for the computer system for the entire courthouse that includes the CAMA system and any computer equipment needs. |
| 11. | Amount of the assessor's budget set aside for education/workshops: |
| | \$500 |
| 12. | Other miscellaneous funds: |
| | n/a |
| 13. | Amount of last year's assessor's budget not used: |
| | \$7,300 |

B. Computer, Automation Information and GIS

| | |
|----|---|
| 1. | Administrative software: |
| | TerraScan |
| 2. | CAMA software: |
| | TerraScan |
| 3. | Are cadastral maps currently being used? |
| | Yes |
| 4. | If so, who maintains the Cadastral Maps? |
| | The maintenance of the cadastral maps is shared between the County Assessor's office and the Register of Deeds office. The maps that are currently in use are not digitized and were flown in the 1970's. |
| 5. | Does the county have GIS software? |
| | Yes |
| 6. | Is GIS available to the public? If so, what is the web address? |
| | Yes, custer.gisworkshop.com |
| 7. | Who maintains the GIS software and maps? |
| | The office staff has all be trained to maintain the GIS system, the vendor will also assist with maintenance. |
| 8. | Personal Property software: |
| | TerraScan |

C. Zoning Information

| | |
|----|---|
| 1. | Does the county have zoning? |
| | Yes |
| 2. | If so, is the zoning countywide? |
| | Yes |
| 3. | What municipalities in the county are zoned? |
| | Ansley, Arnold and Broken Bow |
| 4. | When was zoning implemented? |
| | 2005 |

D. Contracted Services

| | |
|----|---|
| 1. | Appraisal Services: |
| | The county contracts with Stanard Appraisal Services for the commercial class of property only. |
| 2. | GIS Services: |
| | GIS Workshop |
| 3. | Other services: |
| | none |

E. Appraisal /Listing Services

| | |
|----|--|
| 1. | Does the county employ outside help for appraisal or listing services? |
| | Yes, only for the commercial class |
| 2. | If so, is the appraisal or listing service performed under contract? |
| | Yes |
| 3. | What appraisal certifications or qualifications does the County require? |
| | The contract does not specify certifications or qualifications; however, the appriasal service does employ both a Certified General and a Licensed appraiser who will both work within the county. |
| 4. | Have the existing contracts been approved by the PTA? |
| | Yes |
| 5. | Does the appraisal or listing service providers establish assessed values for the county? |
| | Generally, the appraiser will establish valuation models, with final valuation determinations being made by the county assessor. |

2018 Residential Assessment Survey for Custer County

| 1. | Valuation data collection done by: | | | | | | | | | | | | | | | | |
|---------------------------|---|---------------------------|--|----|--|----|---|----|---|----|---|----|---|----|--|----|-------------------------------------|
| | The part-time lister | | | | | | | | | | | | | | | | |
| 2. | List the valuation groupings recognized by the County and describe the unique characteristics of each: | | | | | | | | | | | | | | | | |
| | <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;"><u>Valuation Grouping</u></th> <th style="text-align: center;"><u>Description of unique characteristics</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">01</td> <td>Broken Bow - the largest community in the county and is a hub for business, jobs, and shopping in both the county and the surrounding Sandhills communities. Both growth and demand for existing housing has been stable within the community.</td> </tr> <tr> <td style="text-align: center;">02</td> <td>Callaway - a unique small town in that it contains a hospital, nursing home, and assisted living complex as well as its own school system. These services provide jobs and a demand for housing that is not found in similar sized communities.</td> </tr> <tr> <td style="text-align: center;">03</td> <td>Ansley, Arnold & Merna - these communities are all located within easy commuting distance of jobs and services in larger communities. Each town has its own school system and has local organizations working to keep the towns viable. Growth has been minimal in these areas, and the market is softer than groups one and two but still relatively stable.</td> </tr> <tr> <td style="text-align: center;">04</td> <td>Anselmo, Mason City, Oconto & Sargent - these are small communities, not within easy commuting distance to jobs. The towns have some sales activity annually, but the market is less organized. Values have been flat to slightly decreasing in recent years.</td> </tr> <tr> <td style="text-align: center;">05</td> <td>Berwyn & Comstock - very small communities with few sales annually. Demand for housing is sporadic with no market organization.</td> </tr> <tr> <td style="text-align: center;">06</td> <td>Rural - all properties not within the political boundaries of a town or subdivision. Growth and demand for rural housing continues to be strong throughout the county.</td> </tr> <tr> <td style="text-align: center;">Ag</td> <td>Agricultural homes and outbuildings</td> </tr> </tbody> </table> | <u>Valuation Grouping</u> | <u>Description of unique characteristics</u> | 01 | Broken Bow - the largest community in the county and is a hub for business, jobs, and shopping in both the county and the surrounding Sandhills communities. Both growth and demand for existing housing has been stable within the community. | 02 | Callaway - a unique small town in that it contains a hospital, nursing home, and assisted living complex as well as its own school system. These services provide jobs and a demand for housing that is not found in similar sized communities. | 03 | Ansley, Arnold & Merna - these communities are all located within easy commuting distance of jobs and services in larger communities. Each town has its own school system and has local organizations working to keep the towns viable. | 3. | List and describe the approach(es) used to estimate the market value of residential properties. | | | | | | | | | | | | | | | | |
| | Only the cost approach is used. | | | | | | | | | | | | | | | | |
| 4. | If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor? | | | | | | | | | | | | | | | | |
| | The physical depreciation table is Marshall and Swift depreciation; economic depreciation is developed using local market information. | | | | | | | | | | | | | | | | |
| 5. | Are individual depreciation tables developed for each valuation grouping? | | | | | | | | | | | | | | | | |
| | The physical depreciation table is the same; however, economic depreciation is developed by area. | | | | | | | | | | | | | | | | |
| 6. | Describe the methodology used to determine the residential lot values? | | | | | | | | | | | | | | | | |
| | Lot values are established using a price per square foot analysis. | | | | | | | | | | | | | | | | |
| 7. | Describe the methodology used to determine value for vacant lots being held for sale or resale? | | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | | | |

Vacant lots being held for sale or resale are valued the same as any other lot within the same neighborhood.

In Custer County, all appraisal tables are updated at least once during the six year inspection cycle; this includes updated costing, updated depreciation, and a land study. Due to the size of the county, the review work is divided by location rather than by valuation grouping. Therefore, a portion of the rural is reviewed and revalued each year as are some of the towns/villages. In 2013, because the rural properties seemed to be under assessed, new land and cost tables were implemented for all rural properties. As the remainder of the cycle is completed the rest of the valuation groupings will be updated to the 2013 costing. In order to equalize changes made to the reviewed area with areas not reviewed, a sales study is conducted annually and economic depreciation and land tables are updated in the unreviewed areas as warranted to ensure all areas are consistently at uniform portions of market value.

2018 Commercial Assessment Survey for Custer County

| 1. | Valuation data collection done by: | | | | | | | | | | | | |
|---------------------------|---|---------------------------|--|----|---|----|--|----|---|----|--|----|---|
| | Stanard Appraisal Services | | | | | | | | | | | | |
| 2. | List the valuation groupings recognized in the County and describe the unique characteristics of each: | | | | | | | | | | | | |
| | <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;"><u>Valuation Grouping</u></th> <th><u>Description of unique characteristics</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">01</td> <td>Broken Bow - the county seat, and the largest community in the county. Broken Bow serves as a hub for goods and services in the sandhills communities around it. Broken Bow serves as a hub for goods and services in the sandhills communities around it. There is an active commercial district and good demand for property. | 02 | Arnold and Merna - small villages west and north west of Broken Bow with main street business districts and some demand for commercial property. | 03 | Ansley and Callaway - small villages south and southeast of Broken Bow with main street business districts and some demand for commercial property. | 04 | Mason City and Sargent - small villages in more remote parts of the county with limited main street districts and an unorganized market. | 05 | Anselmo, Berwyn, Comstock, and Oconto - the smallest villages in the county; where there are not active business districts and no demand for commercial property. |
| <u>Valuation Grouping</u> | <u>Description of unique characteristics</u> | | | | | | | | | | | | |
| 01 | Broken Bow - the county seat, and the largest community in the county. Broken Bow serves as a hub for goods and services in the sandhills communities around it. There is an active commercial district and good demand for property. | | | | | | | | | | | | |
| 02 | Arnold and Merna - small villages west and north west of Broken Bow with main street business districts and some demand for commercial property. | | | | | | | | | | | | |
| 03 | Ansley and Callaway - small villages south and southeast of Broken Bow with main street business districts and some demand for commercial property. | | | | | | | | | | | | |
| 04 | Mason City and Sargent - small villages in more remote parts of the county with limited main street districts and an unorganized market. | | | | | | | | | | | | |
| 05 | Anselmo, Berwyn, Comstock, and Oconto - the smallest villages in the county; where there are not active business districts and no demand for commercial property. | | | | | | | | | | | | |
| 3. | List and describe the approach(es) used to estimate the market value of commercial properties. | | | | | | | | | | | | |
| | All three approaches were developed by the contract appraisal service this year for Broken Bow; within the Villages, the cost approach is primarily relied upon. | | | | | | | | | | | | |
| 3a. | Describe the process used to determine the value of unique commercial properties. | | | | | | | | | | | | |
| | Unique commercial properties are valued by the contract appraisal service using sales data from outside the county when appropriate and available. | | | | | | | | | | | | |
| 4. | If the cost approach is used, does the County develop the depreciation study(ies) based on local market information or does the county use the tables provided by the CAMA vendor? | | | | | | | | | | | | |
| | Depreciation is developed using Marshall and Swift physical depreciation with additional forms of depreciation arrived from the market. | | | | | | | | | | | | |
| 5. | Are individual depreciation tables developed for each valuation grouping? | | | | | | | | | | | | |
| | A depreciation study was used for all properties in the county with economic depreciation applied by location. The valuation groupings have been structured to reflect differences in economic depreciation. | | | | | | | | | | | | |
| 6. | Describe the methodology used to determine the commercial lot values. | | | | | | | | | | | | |
| | A sales price per square foot analysis is used to determine commercial lot values. | | | | | | | | | | | | |
| | | | | | | | | | | | | | |

| | | | | | |

Area 5 is south of the South Loup River, the terrain is very rough and is primarily canyons. The majority of the land is used for grazing; however, there is some farming on the plateaus. Although the areas have some characteristic differences, sales have been indicating similar prices for the past several years, therefore, they have been combined for the R&O statistics and all sales will appear under the area 5 substratum. | 2016 | | | | | | | | | | | | | | | |
| | The updated soil conversion was completed for the 2017 assessment year. Continual review of land use by county assessors office on GIS. | | | | | | | | | | | | | | | | |
| 3. | Describe the process used to determine and monitor market areas. | | | | | | | | | | | | | | | | |
| | When the market areas were established factors such as soil type, irrigation potential, land use, and topography were considered. Each year the county assessor plots sales on a county map to monitor market differences in the established areas. | | | | | | | | | | | | | | | | |
| 4. | Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land. | | | | | | | | | | | | | | | | |
| | All parcels under 40 acres that do not have common ownership with adjoining agricultural parcels are reviewed to determine land use. | | | | | | | | | | | | | | | | |
| 5. | Do farm home sites carry the same value as rural residential home sites? If not, what are the market differences? | | | | | | | | | | | | | | | | |
| | Farm home sites and rural residential home sites are valued using the same tables; however, there are two home site values used. One value exists for the majority of the county, but a lower value is used in the more remote areas of the Sandhills. | | | | | | | | | | | | | | | | |
| 6. | If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program. | | | | | | | | | | | | | | | | |
| | Lands enrolled in the Wetland Reserve Program are assessed at 100% of the market value of grass land in the county. | | | | | | | | | | | | | | | | |

**CUSTER COUNTY PLAN OF ASSESSMENT
ASSESSMENT YEARS 2017, 2018 AND 2019**

Introduction

Pursuant to LB 263, Section 9 the assessor shall submit a plan of assessment, which describes the assessment actions planned for the next assessment year and two years thereafter to the county board of equalization on or before July 31, 2017. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. After the budget is approved by the county board a copy of the plan and any amendments thereto shall be mailed to the Property Assessment Division of the Department of Revenue on or before October 31 each year.

Real Property Assessment Requirements

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as “the market value of real property in the ordinary course of trade” NE Rev. Stat. 77-112. (Reissue 2003).

Assessment levels required for real property are as follows:

- 1) 100% of actual value for all classes of real property excluding agricultural and horticultural land;
- 2) 75% of actual value for agricultural and horticultural land; and
- 3) 75% of special value for agricultural and horticultural land that meets the qualifications for special valuation under 77-1344 and 75% of its recapture value as defined in 77-1343 when the land is disqualified for special valuation under 77-1347.

General Description of Real Property in Custer County

Per the 2017 county abstract, Custer County consists of the following real property types;

| | <u>Parcels</u> | <u>% of Total Parcels</u> | <u>% of Taxable Value</u> |
|---------------|----------------|---------------------------|---------------------------|
| Residential | 4698 | 32% | 8.59% |
| Commercial | 812 | 5% | 3.78% |
| Industrial | 4 | .01% | .24% |
| Recreational | 0 | .00% | .00% |
| Agricultural | 8974 | 61.81% | 87.39% |
| Special Value | 0 | .00% | .00% |

Agricultural land-taxable acres were 1,611,056.80 Acres.

Other pertinent facts: Custer County is predominately agricultural and 73% is grassland.

For more information see 2017 Reports and Opinions, Abstract, and Assessor Survey.

Current Resources

A. Staff/Budget/Training:

Assessor/\$54,147/I hold the assessor's certificate when I passed the test in the early 1980's. I have attended many of the IAAO courses and classes of the PA&T. I have all the hours needed at this time to keep the certificate current.

Deputy Assessor/\$40,610/She also holds the assessor's certificate, passing the test in 2015.

3 full time clerks-One clerk has over 10 years experience in the assessor's office and one was hired in January 2015 and one was hired in Jan. 2016.

1 part-time lister. The lister was hired in June 2016.

- B. The Cadastral Maps were flown in the 1970's but are in good condition. They are kept current with monthly land sales. The county board agreed to hire GIS Workshop to measure acres within soil types and land use.
- C. The Property Record cards list all information required by statute with current photos and sketches.
- D. The county uses the TERASCAN software package. There are 5 terminals and 1 public-use terminal.
- E. The county has a Web-site with all parcels listed.

Current Assessment Procedures for Real Property

- A. Discovery: The County now has zoning and has a zoning administrator. Before any construction is allowed, the property owner must file a permit with the zoning administrator and in turn the assessor is notified. At the beginning of the year each property is reviewed for % of completion and valued accordingly. In Real Estate Transfers the name is changed within the month the deed is filed, cadastral maps updated, and a sales review is mailed to the new owner.
- B. Data Collection: The part-time lister travels throughout the different areas each year, measuring each home, and outbuilding, taking new pictures, and interviewing each property owner as to the interior work. In new construction & remodeling the property is inspected inside and out. As sales occur, the sale is used for 3 years to set property values.

C. Review assessment sales ratio studies before assessment actions: The area Field Liaison works very hard with the assessor and staff and with the help of an excel program we enter sales data to be able to adjust the problem areas.

D. Approaches to Value:

1. Market Approach; sales comparison: Using the sales of the various styles, conditions, and ages, I use the information to adjust the depreciation.
2. Cost Approach: The RCN (replacement cost new) is figured with the July 2013 Marshall and Swift values from the TerraScan software system.
3. Income Approach: income and expense data collection/analysis from the market is done by the Commercial Appraiser that is hired to value commercial and industrial properties.
4. Sales of agricultural land are mapped out and when a trend in sales indicate a market area change is required will be the only time areas will change. One market area is set with soil type boundaries and one with natural boundaries such as rivers.

After assessment action, a review of the sales ratio is a top priority.

Notices of valuation changes are mailed to all property owners that have a change of value on June 1 and notices are also published in the local newspaper.

Level of Value, Quality and Uniformity of Assessment Year 2017

| <u>Property Class</u> | <u>Median</u> |
|-----------------------|---------------|
| Residential | 96% |
| Commercial | 96% |
| Agricultural Land | 70% |
| Special Value Ag-land | 00% |

For more information regarding statistical measures see 2017 Reports and Opinions.

ACTION TAKEN

2013 Began the 6 year cycle of review of the different areas in the county. Reviewed with new pictures and revalued using the Marshall & Swift 2013 RCN in the Terra Scan system the townships of Custer, Wood River, Loup, Grant, Delight, Wayne, and Elim. Reviewed the villages of Oconto and Callaway. Value applied to the 2014 tax list.

2014 Reviewed with new pictures and revalued using the Marshall & Swift 2013 cost to build update in the Terra Scan system the townships of Arnold, Hayes, Cliff, Kilfoil and the village of Arnold. Value applied to the 2015 tax list.

2015 Reviewed the villages of Anselmo, and Merna and improvements in the townships of Victory, Triumph, Ryno, Milburn, West Union, Lillian, Corner and maintain the level of assessment required by statute. Adjust the city of Broken Bow because the sales assessment ration indicate a problem. Value applied to the 2016 tax list.

2016 Reviewed villages of Comstock, Sargent, Ansley, Mason City and the improvements in the townships of Garfield, Sargent, Comstock, Spring Creek, Ansley, Algernon, Myrtle, Douglas Grove, Westerville and maintain the level assessment as required by statute. Value applied to the 2017 tax list.

RESIDENTIAL PLAN:

2017 Review for the last of the 6 year cycle the townships of Broken Bow, Elk Creek, Berwyn, and East Custer. Review the village of Berwyn and Broken Bow City. The 2017 Marshall and Swift cost to build update applied for the Broken Bow Township and Broken Bow City. The value will be applied to the 2018 tax list.

2018 Review will begin again with the 6 year cycle taking pictures and using the 2017 Marshall and Swift RCN with the aid of the Terra Scan system for the townships of Custer, Wood River, Loup, Grant, Delight, Wayne, Elim and the villages of Oconto and Callaway. Value will be applied to the 2019 tax list.

2019 With a new assessor in office the plan should stay on track with the review of the townships of Arnold, Hayes, Cliff, Kilfoil and the village of Arnold.

COMMERCIAL:

2017 Begin reviewing on the 6 year cycle for all commercials in Custer County with Stanard Appraisal Service, and the 2017 RCN of Marshall and Swift and the Terra Scan system. Value will be applied to the 2018 tax list.

2018 Value new construction with the help of Stanard Appraisal Service, review the sales and adjust to meet the measurement qualifications.

2019 With a new assessor the cycle of review should stay the same.

AGRICULTURAL LAND:

2017 The land values will be figured at 75% of sales in a 3-year history and these values will be applied to each parcel in each market area.

2018 The land values will be figured at 75% of sales in a 3-year history and these values will be applied to each parcel in each market area.

2019 The land values will be figured at 75% of sales in a 3-year history and these values will be applied to each parcel in each market area.

Other functions preformed by the assessor's office, but not limited to:

I will continue to maintain the parcel records on each property owner making changes monthly of ownership and maintain accurate cadastral maps with ownership changes.

I will continually perform the duties required of me by law to serve the property owners of Custer County and to maintain equality in assessment for all. I will file all the administrative reports required by law/regulations such as abstracts, both real and

personal property, the assessor's survey, the sales information to PA&T rosters & annual assessed value updates, school district taxable value report, homestead exemption tax loss report, and certificate of taxes levied report. I will certify the value to political subdivisions, and report the current values to the Board of Education Lands & Funds of properties they own and report the exempt property and taxable property owned by governmental subdivisions. I will also report to the county board the annual plan of assessment.

I will continually administer the annual filing of all personal property schedules and notify the taxpayer of incomplete filings, failure to file and penalties applied.

I will send the applications for annual filings for permissive exemptions, review and make recommendations to the county board.

I will administer approximately 650 annual filings of applications for homestead exemptions and assist where necessary and continue to monitor approval/denial process and send out denial notification.

I will continue to review the centrally assessed valuation certified by PA&T for railroads and public service entities, and establish assessment records and tax billing for tax list.

I will continue to manage the record/valuation information for properties in community redevelopment project (TIFF) and administer the reports and allocate the ad valorem tax.

I will continue to manage the tax entity boundaries making changes only when legal changes dictate and review the tax rates used for the tax billing process.

I will continue to prepare tax lists and certify these to the county treasurer for real estate, personal, and centrally assessed.

I will continue to attend the county board of equalization meetings for valuation protests and assemble and provide necessary information.

I will prepare information and attend taxpayer appeal hearings before TERC (tax equalization and review commission) to defend county valuations.

I will continue to attend hearing if applicable to the county, defend values and/or implement orders of the TERC.

I will continue to attend meetings, workshops, and educational classes to obtain required hours of continuing education for maintaining my assessor's certificate.

CONCLUSION:

The assessor maintains three budgets; the assessor's functions budget, the reappraisal budget and the GIS budget. The assessor's office budget will be \$192,141. The reappraisal budget will be \$60,600 and the GIS budget will be \$12,800.

Respectfully submitted:

Connie Braithwaite
Custer County Assessor
