The [Property Tax Credit Act \(Act\)](#) was created in 2007 and the purpose of the Act is to provide property tax relief for property taxes levied against real property. The operative statutes are found in [Neb. Rev. Stat. §§ 77-4209 through 77-4212](#).

The Act provides a real property tax credit based on the valuation of each parcel of real property compared to the valuation of all real property in the state. The tax credit amount varies each year depending on appropriation and value.

Beginning 2017, the tax credit allocated more of the funds to agricultural and horticultural land as if those lands were valued at 120% of their actual value. The legislative history for the tax credit is documented in the Property Assessment Division's Annual Report, [Summary of Legal and Legislative Actions](#), under Other Tax Policy Changes.

Pursuant to [Neb. Rev. Stat. § 77-4212 \(4\)](#), the Property Tax Administrator is required to determine the real property tax credit rates and the amount of disbursement available to each county, on or before September 15 and certify to the counties and the State Treasurer. The Department of Revenue also issues an annual news release at the same time regarding the property tax credit rates. All news releases are available at revenue.nebraska.gov/PAD/news_rel/real_prop_news.html.

The following table displays the history of the real property tax credit funding and tax credit rates.
