DEPARTMENT OF REVENUE

**2025 REPORTS AND OPINIONS
OF THE PROPERTY TAX ADMINISTRATOR**

KNOX COUNTY

April 7, 2025

Jim Pillen, Governor

Commissioner Hotz :

The 2025 Reports and Opinions of the Property Tax Administrator have been compiled for Knox County pursuant to [Neb. Rev. Stat. § 77-5027](#). This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Knox County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to [Neb. Rev. Stat. § 77-1514](#).

For the Tax Commissioner

Sincerely,

Sarah Scott
Property Tax Administrator
402-471-5962

cc: Christa Beckmann, Knox County Assessor

- Certificate of Taxes Levied (CTL)
- Assessor Survey
- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

Introduction

Pursuant to [Neb. Rev. Stat. § 77-5027](#) the Property Tax Administrator (PTA) shall annually prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments to be considered by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by [Neb. Rev. Stat. § 77-1327](#). From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level; however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

Statistical Analysis:

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division teammates must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties. The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is the recognition by IAAO of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class	Jurisdiction Size/Profile/Market Activity	COD Range
Residential improved (single family dwellings, condominiums, manuf. housing, 2-4 family units)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
Income-producing properties (commercial, industrial, apartments,)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
Residential vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
Other (non-agricultural) vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to [Neb. Rev. Stat. §77-5023](#), the acceptable range is 69% to 75% of actual value for agricultural land, except for taxes levied to pay school bonds passed after January 12, 2022 for which the acceptable range is 44% to 50% of actual value. For all other classes of real property, the acceptable range is 92% to 100% of actual value.

Analysis of Assessment Practices:

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to [Neb. Rev. Stat. §77-1327](#), a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with [Neb. Rev. Stat. § 77-1311.03](#) and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area.

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the Division, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

**Further information may be found in Exhibit 94*

County Overview

With a total area of 1,108 square miles, Knox County has 8,298 residents, per the Census Bureau Quick Facts for 2023, a 1% population decrease from the 2020 U.S. Census. Reports indicate that 79% of county residents are homeowners and 90% of residents occupy the same residence as in the prior year (Census Quick Facts). The average home value is \$102,914 (2024 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Knox County are located in and around Bloomfield and Creighton. According to the latest information available from the U.S. Census Bureau, there are 255 employer establishments with total employment of 1,545, a 4% decrease in employment.

Agricultural land is the largest contributor to the county’s valuation base. Knox County is included in the Lower Niobrara Natural Resources District (NRD). When compared against the top crops of the other counties in Nebraska, Knox County ranks first in corn for silage. In value of sales by commodity group, Knox County ranks first in poultry and eggs (USDA AgCensus).

2025 Residential Correlation for Knox County

Assessment Practices & Actions

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

The sales qualification and verification processes were reviewed to determine if all arm's length sales are made available for measurement purposes. The sales usability rate for the residential class is near the statewide average. The county assessor sends a sales questionnaire to the buyer and seller to aid in the verification of sales and reports a high return rate. The county assessor provides documented reasons for all sales that are disqualified.

Valuation groups are reviewed to ensure that economic differences are adequately identified and stratified. The Knox County Assessor uses eleven valuation groups primarily based on the assessor locations within the county. There are insufficient sales in most valuation groups for independent analysis.

The six-year inspection and review cycle of the county is examined. Residential properties are valued by the county assessor and office staff, including pick-up work and revaluations. The assessor and staff physically review all properties of the county within the six-year inspection cycle and remain in compliance with statutory requirements. The inspection includes new pictures and measurements if needed, an interview of the interior of the home is requested if available. A call back card is left for the property owner if needed, and additional letters are sent to property owners regarding questions that arose upon review of the property; the assessor reports high return.

The county assessor has a written methodology on file.

Description of Analysis

The statistical sample in the residential class consists of 174 sales. The median is within the acceptable range, the mean and weighted mean are low. The COD is within the acceptable range; the PRD is high. An array of the sales by dollar incremental ranges demonstrates a regressive pattern, that needs to be corrected through reappraisal.

Ten of the twelve valuation groups have sufficient sales and a median within the acceptable range. Valuation Groups 3 and 26 have insufficient sample sizes for measurement purposes. Valuation Group 3 has a median below acceptable range; the COD and PRD are high. The COD of 37% suggests that there is significant disparity in the ratios, which is also seen in the lack of correlation in the measures of central tendency. There is too much dispersion in the sample to rely upon the median of Valuation Group 3.

2025 Residential Correlation for Knox County

The assessment practices indicate the county assessor has kept the costing, land values and depreciation tables updated within the six-year inspection cycle for valuation groups with insufficient sample sizes, a similar rate of all valuation groups in the residential class.

Review of the 2025 County Abstract of Assessment for Real Property, Form 45 compared with the 2024 Certificate of Taxes Levied Report (CTL) indicates that the file and the abstract changed at similar rates.

Equalization and Quality of Assessment

Through a review of assessment practices were reviewed, it was determined that residential property is valued uniformly and in accordance with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	31	92.83	91.15	85.85	13.29	106.17
3	4	72.00	78.35	48.65	36.61	161.05

____ALL____	174	92.77	89.83	85.90	13.44	104.58

Level of Value

Based on analysis of all available information, the level of value for the residential property in Knox County is 93%.

2025 Commercial Correlation for Knox County

Assessment Practices & Actions

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

The sales qualification and verification processes were reviewed. The sales usability rate for the commercial class is near the statewide average. Review of the non-qualified sales roster supports all arm's length sales have been utilized for measurement purposes. A review of the non-qualified sales revealed the majority are substantially changed, family or private sales and private storage that do not reflect market value. The county assessor sends a sales questionnaire to the buyer and seller to aid in the verification of sales. The county assessor provides documented reasons for all sales that are disqualified.

The Knox County Assessor uses eleven valuation groups primarily based on the assessor locations within the county; however, all valuation groups lack a sufficient sample of sales. Therefore, Division's analysis is limited to the overall class.

The six-year inspection and review cycle of the county is examined. Commercial properties are valued by the county assessor and office staff, including pick-up work and revaluations. The county assessor remains in compliance with statutory requirements. The inspection includes new pictures and measurements if needed. The county assessor enters commercial businesses for interior inspection when granted access.

2025 Commercial Correlation for Knox County

Description of Analysis

The statistical sample in the commercial class consists of 22 sales. The median is within acceptable range; the mean and weighted mean are low. The COD and PRD are within acceptable range.

Only six of the eleven valuation groups are represented in the study period; none of them have sufficient sales for measurement purposes.

The 2025 County Abstract of Assessment for Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) shows that the abstract decreased 6%, the sales in total increased 2%. The difference is due to three sales that changed significantly more than others.

Equalization and Quality of Assessment

The review of the assessment practices by the county assessor supported that commercial property assessment in Knox County comply with generally accepted mass appraisal techniques and are uniformly assessed.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	5	92.88	89.65	100.92	12.55	88.83
10	7	92.74	88.74	73.38	16.48	120.93
15	2	97.86	97.86	99.84	04.73	98.02
35	2	86.48	86.48	77.30	17.68	111.88
45	3	93.28	84.62	83.77	12.16	101.01
50	3	82.62	80.88	83.63	20.44	96.71
____ALL____	22	93.06	87.93	85.52	14.71	102.82

Level of Value

Based on analysis of all available information, the level of value for the commercial property in Knox County is 93%.

2025 Agricultural Correlation for Knox County

Assessment Practices & Actions

The Department of Revenue, Property Assessment Division (Division) annually conducts a comprehensive review of assessment practices in each county. The review examines the integrity of the sales data provided to the Division for its ratio studies, as well as the more subjective aspects of the assessment process. The portions of the review that most significantly influence determinations of assessment quality are described herein, along with the assessment actions taken by the county assessor in the current assessment year.

The sales qualification and verification processes are reviewed. The sales usability rate for the agricultural class is below the statewide average. A review of the non-qualified sales revealed the majority are substantially changed, family and private sales that do not reflect market value. The review revealed that no apparent bias exists in the qualification determination and that all arm's-length transactions have been made available for measurement purposes. The county assessor sends a sales questionnaire to the buyer and seller to aid in the verification of sales, and provides documented reasons for all sales that are disqualified.

Three agricultural market areas are used in Knox County for analyzing agricultural sales. Market areas were established by factors such as soil type, irrigation potential, land use and topography. Each year, the assessor plots all sales on the county map and monitor market areas in each established area. Market Area 1 is the southeastern portion of the county consisting of a substantial amount of uplands, silty soil, with abundant irrigation pivots scattered throughout the area. This area has more tillable acres and significant rainfall.

Market Area 2 is the western portion of the county which is utilized more for the grassland characteristics. Sandy soils are abundant with silty, clay subsoils. Majority of the area consists of hilly, wooded, gullies, and rough rangeland acres with less cropland and rainfall available.

Market Area 3 is the northeastern portion of the county and consists of mostly rangeland. This area consists of a mixture of dry and grass characteristics and minimal irrigation wells. This area becomes hilly with sandy soils and less rainfall gradually traveling in northwesterly direction. Geo code 677 has the Bazile Creek winding through the southern portion, with rough hilly areas to the south and west. Geo code 463 has cropland with majority of grassland with waste and gullies becoming more prevalent traveling North.

The county assessor is in compliance with the six-year inspection and review cycle. The county assessor and staff review all agricultural improvements. The inspection includes taking new pictures and measurements if needed. Staff members utilize aerial imagery to update land use. The county assessor sends a letter including a sales questionnaire to identify land use, however, little feedback is received. Feedlots have been identified as intensive use.

Eleven parcels have a special valuation application on file; however, no information exists that would meet the need for special value. All sales and surrounding areas are reviewed.

Description of Analysis

The statistical sample for the agricultural class includes 55 qualified sales. All three measures of central tendency are within the acceptable range. The COD is within acceptable range.

All market areas have medians within the acceptable range. A review of each class by 80% Majority Land Use (MLU) indicates that most sales are grassland sales, and the median is within acceptable range.

The majority of the dryland sales are in Market Area 1, and the median is within acceptable range. Market Areas 2 and 3 for the dryland subclass have medians above acceptable range; the high medians in Market Areas 2 and 3 are influencing the overall dryland median, bringing the statistic above acceptable range. The sample size in each are insufficient to use the median to determine level of value. Dryland in Market Area 2 and 3 historically have few sales for analysis; however, a study of surrounding county agricultural values shows that Knox County's dryland values remain comparable to adjacent counties. Market Area 2 and Market Area 3 dryland values are on the lower end of the value array, further supporting that they are not over assessed.

2025 Agricultural Correlation for Knox County

Market Area 2 dryland is assessed within 5% of the surrounding counties and Market Area 1 dryland. Market Area 3 dryland is assessed within 15% of the surrounding counties; however, it was increased 3% for the 2025 assessment year. Market Area 3 dryland is historically low in comparison to Market Area 1 dryland; review indicates that Market Area 3 dryland is increasing at a consistent rate in comparison to Market Area 1 dryland. The overall trend in the agricultural market and the comparison to surrounding counties supports that Knox County is assessed within the acceptable range.

A review of the 2025 County Abstract of Assessment for Real Property, Form 45 Compared with the 2024 Certificate of Taxes Levied Report (CTL) shows the value changed consistent with the reported actions of the county assessor.

Equalization and Quality of Assessment

Agricultural homes and outbuildings have been valued using the same valuation process as rural residential improvements and are equalized at the statutorily required level.

The reviewed assessment practices of the Knox County Assessor indicates that the land values are assessed uniformly. The quality of assessment for the agricultural class meets generally accepted mass appraisal techniques.

Level of Value

Based on analysis of all available information, the level of value of agricultural land in Knox County is 72%.

2025 Opinions of the Property Tax Administrator for Knox County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
Residential Real Property	93	Meets generally accepted mass appraisal techniques.	No recommendation.
Commercial Real Property	93	Meets generally accepted mass appraisal techniques.	No recommendation.
Agricultural Land	72	Meets generally accepted mass appraisal techniques.	No recommendation.

***A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.*

Dated this 7th day of April, 2025.

Soils CLASS

- Excessive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Moderately well drained silty soils with clay subsoils on uplands
- Lakes

18. Total Value of all Real Property (Locally Assessed)	2,800,568,075	3,026,669,210	226,101,135	8.07%	43,287,799	6.53%

2025 Assessment Survey for Knox County

A. Staffing and Funding Information

1.	Deputy(ies) on staff:
	One
2.	Appraiser(s) on staff:
	None
3.	Other full-time employees:
	Three
4.	Other part-time employees:
	None
5.	Number of shared employees:
	None
6.	Assessor's requested budget for current fiscal year:
	\$353,261
7.	Adopted budget, or granted budget if different from above:
	same as above
8.	Amount of the total assessor's budget set aside for appraisal work:
	N/A
9.	If appraisal/reappraisal budget is a separate levied fund, what is that amount:
	\$23,600
10.	Part of the assessor's budget that is dedicated to the computer system:
	\$36,855
11.	Amount of the assessor's budget set aside for education/workshops:
	\$2,500
12.	Amount of last year's assessor's budget not used:
	\$3,679.37

B. Computer, Automation Information and GIS

1.	Administrative software:
	MIPS
2.	CAMA software:
	MIPS
3.	Personal Property software:
	MIPS
4.	Are cadastral maps currently being used?
	We maintain them but use GIS as main go-to.
5.	If so, who maintains the Cadastral Maps?
	Office staff
6.	Does the county have GIS software?
	gWorks
7.	Is GIS available to the public? If so, what is the web address?
	Yes. Knox.gworks.com
8.	Who maintains the GIS software and maps?
	Deputy Assessor/Appraisal Clerk
9.	What type of aerial imagery is used in the cyclical review of properties?
	gWorks, June 1,2019 the county had flood imagery flown of all creeks, rivers-mainly western part of Knox County. Contract signed with pictometry to begin flying in March of 2024.
10.	When was the aerial imagery last updated?
	2022- Gworks, 2024- Eagleview

C. Zoning Information

1.	Does the county have zoning?
	Yes
2.	If so, is the zoning countywide?
	Yes

3.	What municipalities in the county are zoned?
	All towns and villages
4.	When was zoning implemented?
	July 1995

D. Contracted Services

1.	Appraisal Services:
	None
2.	GIS Services:
	gWorks
3.	Other services:
	None

E. Appraisal /Listing Services

1.	List any outside appraisal or listing services employed by the county for the current assessment year
	None
2.	If so, is the appraisal or listing service performed under contract?
	N/A
3.	What appraisal certifications or qualifications does the County require?
	Standard appraisal qualifications are required by the county.
4.	Have the existing contracts been approved by the PTA?
	N/A
5.	Does the appraisal or listing service providers establish assessed values for the county?
	N/A

2025 Residential Assessment Survey for Knox County

1.	Valuation data collection done by:
	Staff
2.	List and describe the approach(es) used to estimate the market value of residential properties.
	The cost approach is used to determine market value of residential properties.
3.	For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?
	Depreciation tables provided by the CAMA system are used.
4.	Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.
	Three tables are used and economic is adjusted according to the market for each valuation group.
5.	Describe the methodology used to determine the residential lot values?
	Residential lot values are developed by sales/market per square foot. The county uses the 15%-20% land to building range as well.
6.	How are rural residential site values developed?
	Market analysis, compare to surrounding counties.
7.	Are there form 191 applications on file?
	No
8.	Describe the methodology used to determine value for vacant lots being held for sale or resale?
	All lots are treated the same, no applications to combine lots have been received.

2025 Commercial Assessment Survey for Knox County

1.	Valuation data collection done by:
	Staff
2.	List and describe the approach(es) used to estimate the market value of commercial properties.
	The cost approach is used to determine commercial property value.
2a.	Describe the process used to determine the value of unique commercial properties.
	The county would use Marshall & Swift costing and tie in with local sales in determining unique property values.
3.	For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?
	Depreciation tables provided by the CAMA system are used.
4.	Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.
	No, however each groupings economic deprecation is adjusted according to the market.
5.	Describe the methodology used to determine the commercial lot values.
	Commercial lot values are determined by sales/market square foot.

2025 Agricultural Assessment Survey for Knox County

1.	Valuation data collection done by:
	Staff
2.	Describe the process used to determine and monitor market areas.
	Market areas were established in 2010 using factors such as soil type, irrigation potential, land use and topography. We totally revamped the county according to detailed soil and rainfall charts. Each year I plot all the sales on a county map and monitor the markets in each established area.
3.	Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.
	The primary use of the parcel is looked at. Recreational land typically has lake influence. Some recreational land does also include agland that is no longer used to sustain agricultural purposes. This is determined through sales verification and review and inspection of properties.
4.	Do farm home sites carry the same value as rural residential home sites? If not what methodology is used to determine market value?
	Yes, they carry the same value.
5.	What separate market analysis has been conducted where intensive use is identified in the county?
	Currently the county values feedlots at a separate value and identified as intensive use.
6.	If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.
	We value WRP by maintaining the LVG codes, whether grass or waste. Currently there are sales of WRP land so as a basis we value at one-half of the regular grass value. We maintain that there are at least two types of WRP-the typical area along a creek bed that floods regularly and is not sustainable for recreation and the second is the upland areas that are sustained for more specific activities with ideal characteristics for recreation.
6a.	Are any other agricultural subclasses used? If yes, please explain.
	No
	<u>If your county has special value applications, please answer the following</u>
7a.	How many parcels have a special valuation application on file?
	11
7b.	What process was used to determine if non-agricultural influences exist in the county?
	No information exists that would meet the need to apply special value. All sales and surrounding areas reviewed.
	<u>If your county recognizes a special value, please answer the following</u>
7c.	Describe the non-agricultural influences recognized within the county.

	None
7d.	Where is the influenced area located within the county?
	N/A
7e.	Describe in detail how the special values were arrived at in the influenced area(s).
	N/A

1 Deputy Assessor

4 Full Time Clerk/Appraisers May 6 '24 1 new employee hired. July 31, '24

Assessor Monica retired. Aug 1, '24 Deputy Assessor Christa was sworn in as

Assessor to finish Monica's term, Aug 12, '24 new Deputy Assessor Kylee sworn in.

All general staff functions are performed by everyone in the office. Clerks have their specific job they are in charge of but all general functions are shared. This makes all help accessible at all times to any customer. The Assessor prepares the reports. Newly appointed Deputy Assessor Kylee is in charge of GIS mapping, organizing

review work, Homestead Exemptions and educating the clerks and helps with other tasks.

Contract Appraiser

No appraisers on contract.

EagleView Technologies has flown the county in March 2024. Imagery uploaded in April 2024.

Computer Vendor

MIPS was implemented in May 2023, many files have been corrected from conversion. Continued checks are still being made.

GIS

GIS Workshop

Training

As the Assessor, I have attended all workshops and completed my educational hours needed to maintain my Assessor Certificate. The Deputy Assessor and the office clerks all attend school on a regular basis, whenever classes can be organized. We have utilized the Webinar trainings. We need more of this for credit hours-it's worked wonderfully! It is a good idea for education that is otherwise hard to acquire.

2024 R & O Statistics

Property Class	Median	COD	PRD
Residential	93.51%	13.32	104.86
Commercial	94.23%	15.55	105.16
Agricultural	69.34%	25.71	106.74

3 Year Appraisal Plan

Current 2024

Residential

Lake-Yearly maintenance will be completed on the lake area. We have many very active lake areas which makes it difficult to constantly keep up to date. The lake seems to be very popular whether you can see the water or not. Sale review includes either a physical inspection of the property and/or questionnaires, telephone calls or physical inspection of the property. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Towns- Implemented the remaining towns that were physically reviewed in 2023. Two new employees learned the review and valuation process, as well as all employees became familiar with MIPS. It has taken some time to become familiar with the new program, which is different than TerraScan. Yearly appraisal maintenance will continue. Sale review includes either a physical inspection of the property and/or questionnaires, telephone calls or physical inspection of the property. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Rural- Organization for the rural review began July 1st. Rural farm reviews will be organized by market areas and plans set forth for a major review, normally taking 3 years to complete. We are starting in the Eastern part of the county, which is market areas 1 & 3. Desktop review was started by viewing the aerial flights taken by EagleView in March, August 5th started the physical review to get updated photos. Implementation of review and updated pricing will be placed on 2025 tax roll for market area 1 & 3. The rural review is so difficult to undertake because of the miles and miles of roads that do not go through. Last reviews included hiring outside of the office because of not enough employees to maintain the office work and also to be available every day to go out and review. The old process of hiring outside help, appears very slim in happening now for the next review, according to our board of supervisors. We are not a county of through roads in the western and middle sections of the county. Rural questionnaires will be mailed as needed when no one is home at time of physical review, door knockers are left to inform property owners of our review and they have called in to go over stats. Yearly maintenance will include sale review and pickup work. Sale review, for the rural homes (and buildings), includes questionnaires, telephone calls &/or physical inspection of the property. We make all efforts to talk to either the buyer, the seller or the realtor. All building permits and information statements are physically reviewed. Sale review includes either a physical inspection of the property and/or questionnaires, telephone calls or physical inspection of the property. We make all efforts to contact either the buyer or the

seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Commercial

Maintenance will continue on all commercial property. Generally, we have a low number of commercial sales with many single type sales. It is very difficult to compare all because of the uniqueness and the small number of properties selling. Sale review includes either a physical inspection of the property and/or questionnaires or telephone calls. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Agricultural

A market analysis of agricultural sales by land classification groupings was conducted to determine any possible adjustments to comply with statistical measures. As in the past, all sales will be plotted on a county map in our office showing the market areas and the price paid. The market analysis is conducted in house, using all information collected. My liaison is kept up to date. This year market area #1 had increases in all classes, grass increased 50%, dry increased 30% and irrigation 21%. Market area #2 grass increased 25%, dry increased 15% and irrigation increased 30%. Market area #3 grass increased 50%, dry increased 30% and irrigation increased 10% in valuation. Sales review and pickup work will also be completed by the office staff. GIS updates will continue using the new 2024 aerials that were provided to us by EagleView.

Other

Assessor, Deputy Assessor and personnel shall gather all information, transfer and value real estate and personal property pertinent to the valuations of Knox County. Duties include gathering all personal property by printing and mailing postcards to all individuals for the May 1 deadline; preparing each personal property with data entry; printing and mailing homestead exemptions to the individuals and working with the persons to help them file their returns; transferring all homestead information to PAD; generate an airport authority report; report exempt property being used by taxable entity; gather and handle all Form 521 sale information and work within preparing rosters and value within each market area, scan all 521's to the PAD; transfer all name changes and and get the required original information into the state department after the sale date; work with attorney's and realtor's on incorrect 521's because the register of deeds say they have to accept right or wrong; set the yearly valuations to meet all state statistical ranges; change property names;

handle the splits; maintain property record cards; generate yearly record sheets each year after PAD and TERC ok's our valuations; keep mapping up to date, generate valuation change notices, prepare omitted, over and undervalued notices and report to the clerk; hear protests, review and visit each protest sight; prepare copies of the evidence to CBOE; prepare all evidence for the CBOE for TERC cases filed by property owners; keep track of growth and enter in each file; prepare centrally assessed values; generate and compile all valuations and distribute to each entity; certify school valuations; correct sales file roster; prepare charitable exemptions; combine and balance levies; accept and combine levies for the post card bill; generate the post card bill; combine and balance and enter levies; prepare all property for taxation; prepare Certified Tax List; prepare federal school aid reports for Niobrara and Santee; generate tax roles; prepare tax list corrections; on the cyclical reviews-organize full town and rural door to door reviews every 6 years for each one; prepare updates with FSA records brought in by the producer; work with the local NRD's; update CRP records that producers bring in; maintain the cadastral maps and the GIS.

2025

Residential

Lake/Towns- Yearly appraisal maintenance will be done for the residential lake and city, which includes sale reviews and pickup work. Sale review includes either a physical inspection of the property and/or questionnaires, telephone calls or physical inspection of the property. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Rural- Rural home and farm building review shall continue in market area 2, a major undertaking of the rural areas. Implementation of review and updated pricing will be placed on 2026 tax roll for market area 2. As always, this task can take two or three years plus to complete. Sale review includes either a physical inspection of the property and/or questionnaires, telephone calls or physical inspection of the property. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Commercial - Commercial properties will be identified and prepared for the cyclical review. Somehow, the commercial and rural reviews have landed in the same cyclical review pattern. This did happen after hiring an outside individual to review the rural. At that same time, we reviewed partial commercial on our own, while a company worked on their own time to review the bigger complicated commercials.

They did not return with some of our information until 1.5 years later. Maintenance will be the agenda for all commercial properties. Knox County generally has a low number of commercial sales with many single type sales. Normally it is very hard to compare because of the uniqueness and the small number of properties selling. Sale review includes either a physical inspection of the property and/or questionnaires or telephone calls. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Agricultural

A market analysis of agricultural sales by land classification groupings will be conducted to determine any possible adjustments to comply with statistical measures. As in the past, all sales will be plotted on a county map in our office showing the market areas and the price paid. The market analysis is conducted in house, using all information collected. Sale review and pickup work will also be completed by the office staff. GIS updates are continuing.

Other

Assessor, Deputy Assessor and personnel shall gather all information, transfer and value real estate and personal property pertinent to the valuations of Knox County. Duties include gathering all personal property by printing and mailing postcards to all individuals for the May 1 deadline; preparing each personal property with data entry; printing and mailing homestead exemptions to the individuals and working with the persons to help them file their returns; transferring all homestead information to PAD; generate an airport authority report; report exempt property being used by taxable entity; gather and handle all Form 521 sale information and work within preparing rosters and value within each market area, scan all 521's to the PAD; transfer all name changes and get the required original information into the state department after the sale date; work with attorney's and realtor's on incorrect 521's because the register of deeds say they have to accept right or wrong; set the yearly valuations to meet all state statistical ranges; change property names; handle the splits; maintain property record cards; generate yearly record sheets each year after PAD and TERC ok's our valuations; keep mapping up to date, generate valuation change notices, prepare omitted, over and undervalued notices and report to the clerk; hear protests, review and visit each protest sight; prepare copies of the evidence to CBOE; prepare all evidence for the CBOE for TERC cases filed by property owners; keep track of growth and enter in each file; prepare centrally assessed values; generate and compile all valuations and distribute to each entity; certify school valuations; correct sales file roster; prepare charitable exemptions; combine and balance levies; accept and combine levies for the post card bill; generate

the post card bill; combine and balance and enter levies; prepare all property for taxation; prepare Certified Tax List; prepare federal school aid reports for Niobrara and Santee; generate tax roles; prepare tax list corrections; on the cyclical reviews-organize full town and rural door to door reviews every 6 years for each one; prepare updates with FSA records brought in by the producer; work with the local NRD's; update CRP records that producers bring in; maintain the cadastral maps and the GIS.

2026

Residential

Lake/Towns- Yearly appraisal maintenance will be done for the residential lake and city, which includes sale reviews and pickup work. Sale review includes either a physical inspection of the property and/or questionnaires, telephone calls or physical inspection of the property. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Rural- Yearly maintenance will include sale review and pickup work. Sale reviews include questionnaires, telephone calls &/or physical inspection of the property. We make all efforts to talk to either the buyer, the seller or the realtor. All building permits and information statements are physically reviewed. We continually review all files for accuracy and correct statistics.

Commercial- Commercial review shall have gotten started. Appraisal maintenance will be the agenda for all commercial property. Knox County generally has a low number of commercial sales with many single type sales. Normally it is very hard to compare because of the uniqueness and the small number of properties selling. Sale review includes either a physical inspection of the property and/or questionnaires or telephone calls. We make all efforts to contact either the buyer or the seller or the realtor involved. Pickup work includes physical inspection of all building permits. We will continually review each file for accuracy and correct statistics.

Agricultural

A market analysis of agricultural sales by land classification groupings will be conducted to determine any possible adjustments to comply with statistical measures. As in the past, all sales will be plotted on a county map in our office showing the market areas and the price paid. The market analysis is conducted in house, by

myself, using all information collected. Sales review and pickup work will also be completed by the office staff. GIS updates are continuing.

Other

Assessor, Deputy Assessor and personnel shall gather all information, transfer and value real estate and personal property pertinent to the valuations of Knox County. KNOX COUNTY

2025 Methodology for Special Value

During an intensive market study in Knox County, all sales were examined thoroughly and through this process, I have concluded that there is no difference in the market to show a reason to value by special valuation. There were no market factors shown other than that of purely agricultural purposes. Knox County consists mostly of rolling grasslands to the West and North and heavier cropped soils to the South and East, all conducive to our grazing/farming industry.

Christa M Beckmann
Knox County Assessor

Knox County accepted applications in March of 2012.

#1) Jerry Hanefeldt-8 applications all in either 13-30-5 or 24-30-5 Valley Township

#2) Foner Farms-3 applications all in either 7-32-5 or 8-32-5 Niobrara Township
