**2022 REPORTS AND OPINIONS  
OF THE PROPERTY TAX ADMINISTRATOR**

---

**MORRILL COUNTY**

Pete Ricketts, Governor

April 7, 2022

Commissioner Keetle :

The Property Tax Administrator has compiled the 2022 Reports and Opinions of the Property Tax Administrator for Morrill County pursuant to [Neb. Rev. Stat. § 77-5027](#). This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Morrill County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to [Neb. Rev. Stat. § 77-1514](#).

For the Tax Commissioner

Sincerely,

A handwritten signature in black ink that reads "Ruth A. Sorensen".

Ruth A. Sorensen  
Property Tax Administrator  
402-471-5962

cc: Rose Nelson, Morrill County Assessor

- Three-Year Plan of Assessment
- Special Value Methodology (if applicable)
- Ad Hoc Reports Submitted by County (if applicable)

## Introduction

---

Pursuant to [Neb. Rev. Stat. § 77-5027](#), annually, the Property Tax Administrator (PTA) shall prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments for consideration by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by [Neb. Rev. Stat. § 77-1327](#). From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level – however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

### **Statistical Analysis:**

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division staff must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to [Neb. Rev. Stat. §77-5023](#), the acceptable range is 69% to 75% of actual value for agricultural land and 92% to 100% for all other classes of real property.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

General Property Class	Jurisdiction Size/Profile/Market Activity	COD Range
Residential improved (single family dwellings, condominiums, manuf. housing, 2-4 family units)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 10.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 15.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 20.0
Income-producing properties (commercial, industrial, apartments,)	Very large jurisdictions/densely populated/newer properties/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/older & newer properties/less active markets	5.0 to 20.0
	Rural or small jurisdictions/older properties/depressed market areas	5.0 to 25.0
Residential vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 15.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 20.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 25.0
Other (non-agricultural) vacant land	Very large jurisdictions/rapid development/active markets	5.0 to 20.0
	Large to mid-sized jurisdictions/slower development/less active markets	5.0 to 25.0
	Rural or small jurisdictions/little development/depressed markets	5.0 to 30.0

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is IAAO's recognition of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

### **Analysis of Assessment Practices:**

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to [Neb. Rev. Stat. §77-1327](#), a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with [Neb. Rev. Stat. § 77-1311.03](#) and also to confirm that all property is being uniformly listed and described for valuation purposes.

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area.

Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the review done by Division staff, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

*\*Further information may be found in Exhibit 94*

## County Overview

With a total area of 1,424 square miles, Morrill County has 4,555 residents, per the Census Bureau Quick Facts for 2020, an 10% population decline from the 2010 U.S. Census. Reports indicate that 72% of county residents are homeowners and 91% of residents occupy the same residence as in the prior year (Census Quick Facts). The average home value is \$74,376 (2021 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Morrill County are located in and around the county seat of Bridgeport. According to the latest information available from the U.S. Census Bureau, there are 108 employer establishments with total employment of 764, for a 6% increase in employment.

Agricultural land accounts for the majority of the valuation base throughout the county. Grassland makes up the majority of the land in the county. Morrill County is included in the North Platte Natural Resources District (NRD). When compared against the top crops of the other counties in Nebraska, Morrill County ranks third in dry edible beans. The feedlots, ethanol plant, grain-handling facilities and fertilizer plant are also contributory factors to the local agricultural economy.

# 2022 Residential Correlation for Morrill County

---

## *Assessment Actions*

A 15% and 25% increase was applied to Valuation Group 4 and Valuation Group 2, respectfully. Appraisal maintenance and pick-up work was completed.

## *Assessment Practice Review*

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

A review of the sales qualification and verification process included examination of the comments on all non-qualified parcels with the county assessor. It was determined that the usability rate, which was lower than the statewide average, was supported by the thorough documentation provided by the county assessor. The use of sales questionnaires and follow-up questions adds validity to the process.

The three villages of Bridgeport, Bayard and Broadwater in addition to the rural parcels comprise the four valuation groups used by the county assessor. The unique economic areas of the county are reflected by the use these four groups.

Costing and depreciation tables that are used are from 2020. Lot studies range from 2015 through 2020 depending on the valuation group. A written valuation methodology has not been provided to the Property Assessment Division (Division).

## *Description of Analysis*

Four valuation groups are used to analyze the four different economic characteristics that are found in Morrill County.

<b>Valuation Group</b>	<b>Description</b>
1	Bridgeport
2	Bayard
3	Broadwater
4	Rural

The current study period yielded a total of 87 qualified sales. All three measures of central tendency were in range. The COD is at 22% while the PRD is slightly elevated at 105%. The county assessor has relied on per cent increases the last few years which is going to have a tendency to develop regressive patterns. Updated valuation models will be needed for the 2023 assessment year to improve vertical equity. Valuation Groups 1 and 2 are in the acceptable range. Valuation

## 2022 Residential Correlation for Morrill County

---

Group 3 with 5 sales is in range but shows a lot of dispersion in the sales. Valuation Group 4 also with only five sales is below the range but has had blanket increases the last three years.

Analysis of the change in values in the sales and the abstract demonstrates a similar pattern of movement. The observed changes coincide with the assessment actions taken by the county assessor. A comparison of the value change in the 2022 County Abstract of Assessment, Form 45 Compared with the 2021 Certificate of Taxes Levied Report (CTL) reflects the assessment actions that were taken by the county assessor.

### *Equalization and Quality of Assessment*

The review of the residential property assessment actions in Morrill County indicates that the residential property class is valued uniformly and is in compliance with generally accepted mass appraisal techniques.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	41	96.16	97.74	93.45	18.02	104.59
2	36	93.84	100.82	95.76	28.21	105.28
3	5	97.31	80.63	67.06	25.94	120.24
4	5	83.47	84.75	83.68	06.45	101.28
<u>    ALL    </u>	<u>87</u>	94.56	97.28	92.60	22.46	105.05

### *Level of Value*

Based on analysis of all available information, the level of value for the residential property in Morrill County is 95%.

# 2022 Commercial Correlation for Morrill County

---

## *Assessment Actions*

Pick-up work and routine maintenance was completed in Morrill County.

## *Assessment Practice Review*

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

Due to the low usability rate of the commercial class, a review of the sales qualification and verification process was performed. The examination of the sales roster demonstrated that sufficient reasons for disqualification are provided. Utilizing all qualified and non-qualified sales, then trimming the extreme ratios on both ends of the array yielded improved qualitative measures, suggesting that the county assessor could be excessively trimming the sample and that the trimming is negatively impacting the qualitative measures. The median did not change. The analysis supports that there was no discerned bias in the qualification decisions.

The six-year review and inspection cycle is in compliance with statutory requirements. The costing tables and depreciation tables are both dated 2020. The physical inspection and review cycle is aided by a contract appraisal firm which uses the local market and surrounding counties to develop the depreciation studies.

## *Description of Analysis*

Two different value groups are used by the county assessor to segregate the sales according to different economic characteristics.

<b>Valuation Group</b>	<b>Description</b>
1	Bridgeport
2	Bayard, Broadwater and Rural

The current study period yielded 12 sales with a median in the acceptable range. The overall COD was in the acceptable range while the PRD affected by the dispersion of low and high ratios across the strata. Valuation Group 2 with 10 sales produced a median in range as well. The remaining two sales in Valuation Group 1 did not have a sufficient sample size for reliable statistical analysis.

A review of the 2022 County Abstract of Assessment for Real Property, Form 45, Compared with the 2021 Certificate of Taxes Levied Report (CTL) shows a very slight decrease from the previous year which corresponds with the assessment actions of the county assessor.

## 2022 Commercial Correlation for Morrill County

---

### *Equalization and Quality of Assessment*

With only 12 total commercial sales in Morrill County, the review of the assessment practices is a substantial portion of determining that commercial property assessment is in compliance with generally accepted mass appraisal techniques and is uniformly assessed.

VALUATION GROUP						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
1	2	74.32	74.32	61.04	34.57	121.76
2	10	95.76	89.77	82.35	19.84	109.01
____ALL____	12	95.76	87.19	78.54	21.00	111.01

### *Level of Value*

Based on analysis of all available information, the level of value for the commercial property in Morrill County is determined to be at the statutory level of 100% of market value.

# 2022 Agricultural Correlation for Morrill County

---

## *Assessment Actions*

A physical inspection of all agricultural improved parcels within the west central portion of the county was completed.

## *Assessment Practice Review*

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

The sales verification and qualification process was reviewed with the county assessor. The most recent usability rate has improved to near statewide averages. There is sufficient documentation for non-qualified sales.

Three market areas are used to value agricultural land in Morrill County. The market areas are primarily indicated by geographic differences. Market Area 2 is found in the northern part of the county and is primarily grassland. Market Area 3 is located south of the North Platte River and consists of grassland and cropland. The center portion of the county along the North Platte River is Market Area 4 which is heavily influenced by special values due to the hunting and recreational use.

Intensive use has been identified in the county in the form of feedlots which Standard Appraisal has valued. CRP land is valued the same as dryland, and, CREP land is valued as irrigated land.

## *Description of Analysis*

There was a total of 33 agricultural land sales in the three market areas. All the measures of central tendency are in range when looking at the total sales.

When sales are reviewed by market area, only Market Area 3 has sufficient sales. Market Area 2 with a small sample is slightly above the range.

Sales by 80% Majority Land Use (MLU) finds grassland and irrigated land ratios in range. Dryland had insufficient sales to be statistically meaningful. Further stratification by 80% MLU by market area demonstrates irrigated sales are in range. Dryland and grassland had insufficient sales for statistical reliability. In Market Areas 2 & 3 the price per acre for grass is in the median of price per acre among surrounding counties. The county is assessed within the acceptable range.

A comparison of the 2022 County Abstract of Assessment for Real Property, Form 45 Compared to the 2021 Certificate of Taxes Levied Report (CTL) indicated that both the sold properties and the abstract changed similarly.

## *Equalization and Quality of Assessment*

The favorable review of the assessment practices of the county assessor, and the overall comparison to the agricultural economy in the region supports that land values in Morrill County

## 2022 Agricultural Correlation for Morrill County

are assessed uniformly and according to generally accepted mass appraisal techniques. Outbuildings in the agricultural class and rural residential improvements appear to demonstrate equalized valuation.

80%MLU By Market Area						
RANGE	COUNT	MEDIAN	MEAN	WGT.MEAN	COD	PRD
<u>Irrigated</u>						
County	10	71.76	72.70	72.51	04.28	100.26
3	9	71.81	72.88	72.59	04.64	100.40
4	1	71.07	71.07	71.07	00.00	100.00
<u>Dry</u>						
County	2	59.60	59.60	59.97	05.64	99.38
3	2	59.60	59.60	59.97	05.64	99.38
<u>Grass</u>						
County	16	73.93	69.51	75.44	13.38	92.14
2	7	75.75	76.46	79.44	07.63	96.25
3	9	66.96	64.11	66.27	18.10	96.74
<u>ALL</u>	33	71.81	70.85	74.06	10.67	95.67

### *Level of Value*

Based on analysis of all available information, the level of value of agricultural land in Morrill County is 72%.

### *Special Valuation*

A review of agricultural land values in Morrill County in areas that have non-agricultural influences indicates that the assessed values used are similar to the assessed values in the areas of the county that do not have non-agricultural influences. Therefore, it is the opinion of the Property Tax Administrator that the level of value for Special Valuation of agricultural land is 72%.

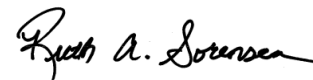

## 2022 Opinions of the Property Tax Administrator for Morrill County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

Class	Level of Value	Quality of Assessment	Non-binding recommendation
<b>Residential Real Property</b>	95	Meets generally accepted mass appraisal techniques.	No recommendation.
<b>Commercial Real Property</b>	100	Meets generally accepted mass appraisal techniques.	No recommendation.
<b>Agricultural Land</b>	72	Meets generally accepted mass appraisal techniques.	No recommendation.
<b>Special Valuation of Agricultural Land</b>	72	Meets generally accepted mass appraisal techniques.	No recommendation.

*\*\*A level of value displayed as NEI (not enough information) represents a class of property with insufficient information to determine a level of value.*

Dated this 7th day of April, 2022.

- Registered\_WellsDNR
- geocode
- Federal Roads

**Soils  
CLASS**

- Excessive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills
- Excessively drained sandy soils formed in eolian sands on uplands in sandhills
- Moderately well drained silty soils on uplands and in depressions formed in loess
- Well drained silty soils formed in loess on uplands
- Well drained silty soils formed in loess and alluvium on stream terraces
- Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands
- Somewhat poorly drained soils formed in alluvium on bottom lands
- Moderately well drained silty soils with clay subsoils on uplands
- Lakes

## 2022 Assessment Survey for Morrill County

### A. Staffing and Funding Information

<b>1.</b>	<b>Deputy(ies) on staff:</b>
	1
<b>2.</b>	<b>Appraiser(s) on staff:</b>
	0
<b>3.</b>	<b>Other full-time employees:</b>
	2
<b>4.</b>	<b>Other part-time employees:</b>
	0
<b>5.</b>	<b>Number of shared employees:</b>
	0
<b>6.</b>	<b>Assessor's requested budget for current fiscal year:</b>
	\$255,429
<b>7.</b>	<b>Adopted budget, or granted budget if different from above:</b>
	\$255,429
<b>8.</b>	<b>Amount of the total assessor's budget set aside for appraisal work:</b>
	\$16,000 (Stanard Appraisal Service and Pritchard & Abbott)
<b>9.</b>	<b>If appraisal/reappraisal budget is a separate levied fund, what is that amount:</b>
	Not applicable.
<b>10.</b>	<b>Part of the assessor's budget that is dedicated to the computer system:</b>
	\$17,000
<b>11.</b>	<b>Amount of the assessor's budget set aside for education/workshops:</b>
	\$3,000
<b>12.</b>	<b>Amount of last year's assessor's budget not used:</b>
	\$21,310

## B. Computer, Automation Information and GIS

1.	<b>Administrative software:</b>
	MIPS
2.	<b>CAMA software:</b>
	MIPS
3.	<b>Personal Property software:</b>
	MIPS
4.	<b>Are cadastral maps currently being used?</b>
	Yes
5.	<b>If so, who maintains the Cadastral Maps?</b>
	Assessor's office.
6.	<b>Does the county have GIS software?</b>
	Yes
7.	<b>Is GIS available to the public? If so, what is the web address?</b>
	Yes, morrill.gworks.com
8.	<b>Who maintains the GIS software and maps?</b>
	Office personnel and gWorks
9.	<b>What type of aerial imagery is used in the cyclical review of properties?</b>
	gWorks
10.	<b>When was the aerial imagery last updated?</b>
	2020

## C. Zoning Information

1.	<b>Does the county have zoning?</b>
	Yes
2.	<b>If so, is the zoning countywide?</b>
	Yes

<b>3.</b>	<b>What municipalities in the county are zoned?</b>
	Bridgeport, Bayard, and Broadwater are all zoned.
<b>4.</b>	<b>When was zoning implemented?</b>
	2001

#### **D. Contracted Services**

<b>1.</b>	<b>Appraisal Services:</b>
	Stanard Appraisal Services - real property Pritchard & Abbott - oil & gas minerals
<b>2.</b>	<b>GIS Services:</b>
	GWorks, Inc
<b>3.</b>	<b>Other services:</b>
	MIPS

#### **E. Appraisal /Listing Services**

<b>1.</b>	<b>List any outside appraisal or listing services employed by the county for the current assessment year</b>
	Yes: Stanard Appraisal Service and Pritchard & Abbott
<b>2.</b>	<b>If so, is the appraisal or listing service performed under contract?</b>
	Yes
<b>3.</b>	<b>What appraisal certifications or qualifications does the County require?</b>
	General certification
<b>4.</b>	<b>Have the existing contracts been approved by the PTA?</b>
	Yes
<b>5.</b>	<b>Does the appraisal or listing service providers establish assessed values for the county?</b>
	Provides recommendations to the county assessor for use in establishing final value estimates.

## 2022 Residential Assessment Survey for Morrill County

<b>1.</b>	<b>Valuation data collection done by:</b>														
	Office and Stanard Appraisal Service.														
<b>2.</b>	<b>List the valuation group recognized by the County and describe the unique characteristics of each:</b>														
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;"><u>Valuation Group</u></th> <th style="text-align: center;"><u>Description of unique characteristics</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td>Bridgeport would be considered the main business district for the county, and would have a higher exposure to the market and highway traffic.</td> </tr> <tr> <td style="text-align: center;">2</td> <td>Bayard is closer in proximity to Scottsbluff and the residential market is somewhat influenced by this locational and economic factor.</td> </tr> <tr> <td style="text-align: center;">3</td> <td>Broadwater lies to the east of Bridgeport. There are no other villages within the county to compare it to, it is a market within itself.</td> </tr> <tr> <td style="text-align: center;">4</td> <td>The rural market is a reflection of those wanting to live outside of town and enjoy the amenities of country living.</td> </tr> <tr> <td style="text-align: center;">AG DW</td> <td>Dwellings located on rural parcels.</td> </tr> <tr> <td style="text-align: center;">AG OB</td> <td>Agricultural outbuildings.</td> </tr> </tbody> </table>	<u>Valuation Group</u>	<u>Description of unique characteristics</u>	1	Bridgeport would be considered the main business district for the county, and would have a higher exposure to the market and highway traffic.	2	Bayard is closer in proximity to Scottsbluff and the residential market is somewhat influenced by this locational and economic factor.	3	Broadwater lies to the east of Bridgeport. There are no other villages within the county to compare it to, it is a market within itself.	4	The rural market is a reflection of those wanting to live outside of town and enjoy the amenities of country living.	AG DW	Dwellings located on rural parcels.	AG OB	Agricultural outbuildings.
<u>Valuation Group</u>	<u>Description of unique characteristics</u>														
1	Bridgeport would be considered the main business district for the county, and would have a higher exposure to the market and highway traffic.														
2	Bayard is closer in proximity to Scottsbluff and the residential market is somewhat influenced by this locational and economic factor.														
3	Broadwater lies to the east of Bridgeport. There are no other villages within the county to compare it to, it is a market within itself.														
4	The rural market is a reflection of those wanting to live outside of town and enjoy the amenities of country living.														
AG DW	Dwellings located on rural parcels.														
AG OB	Agricultural outbuildings.														
<b>3.</b>	<b>List and describe the approach(es) used to estimate the market value of residential properties.</b>														
	Cost and sales are considered to determine the market value of residential properties. However, the sales will be utilized the most in building models.														
<b>4.</b>	<b>For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?</b>														
	The appraisal company will review the sales and build models, the sales will be charted for a cost range per square foot based on style, quality, condition and age. Plus or minus adjustment factors will be developed for, but not limited to; basement, basement finish, number of garage stalls, fireplace, central air, and so on to arrive at a final value estimate per square foot.														
<b>5.</b>	<b>Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.</b>														
	Values are established primarily from a model based on a cost range per square foot.														
<b>6.</b>	<b>Describe the methodology used to determine the residential lot values?</b>														
	Land is valued by a square foot method.														
<b>7.</b>	<b>How are rural residential site values developed?</b>														
	Assessor utilizes sales of improved rural residential sales to reach market value. Excess acres to be valued at 100% of grass values.														

8.	<b>Are there form 191 applications on file?</b>																																							
	No																																							
9.	<b>Describe the methodology used to determine value for vacant lots being held for sale or resale?</b>																																							
	Lot values are valued the same as adjacent properties.																																							
10.	<table border="1"> <thead> <tr> <th data-bbox="201 359 363 443"><u>Valuation Group</u></th> <th data-bbox="363 359 651 443"><u>Date of Depreciation Tables</u></th> <th data-bbox="651 359 906 443"><u>Date of Costing</u></th> <th data-bbox="906 359 1175 443"><u>Date of Lot Value Study</u></th> <th data-bbox="1175 359 1484 443"><u>Date of Last Inspection</u></th> </tr> </thead> <tbody> <tr> <td data-bbox="201 443 363 499">1</td> <td data-bbox="363 443 651 499">2020</td> <td data-bbox="651 443 906 499">2020</td> <td data-bbox="906 443 1175 499">2015</td> <td data-bbox="1175 443 1484 499">2015</td> </tr> <tr> <td data-bbox="201 499 363 556">2</td> <td data-bbox="363 499 651 556">2020</td> <td data-bbox="651 499 906 556">2020</td> <td data-bbox="906 499 1175 556">2016</td> <td data-bbox="1175 499 1484 556">2017</td> </tr> <tr> <td data-bbox="201 556 363 613">3</td> <td data-bbox="363 556 651 613">2020</td> <td data-bbox="651 556 906 613">2020</td> <td data-bbox="906 556 1175 613">2016</td> <td data-bbox="1175 556 1484 613">2016</td> </tr> <tr> <td data-bbox="201 613 363 669">4</td> <td data-bbox="363 613 651 669">2020</td> <td data-bbox="651 613 906 669">2020</td> <td data-bbox="906 613 1175 669">2020</td> <td data-bbox="1175 613 1484 669">2019-2020</td> </tr> <tr> <td data-bbox="201 669 363 726">AG DW</td> <td data-bbox="363 669 651 726">2020</td> <td data-bbox="651 669 906 726">2020</td> <td data-bbox="906 669 1175 726">2018</td> <td data-bbox="1175 669 1484 726">2019-2020</td> </tr> <tr> <td data-bbox="201 726 363 785">AG OB</td> <td data-bbox="363 726 651 785">2020</td> <td data-bbox="651 726 906 785">2020</td> <td data-bbox="906 726 1175 785">2018</td> <td data-bbox="1175 726 1484 785">2019-2020</td> </tr> </tbody> </table>					<u>Valuation Group</u>	<u>Date of Depreciation Tables</u>	<u>Date of Costing</u>	<u>Date of Lot Value Study</u>	<u>Date of Last Inspection</u>	1	2020	2020	2015	2015	2	2020	2020	2016	2017	3	2020	2020	2016	2016	4	2020	2020	2020	2019-2020	AG DW	2020	2020	2018	2019-2020	AG OB	2020	2020	2018	2019-2020

## 2022 Commercial Assessment Survey for Morrill County

<b>1.</b>	<b>Valuation data collection done by:</b>																		
	Office staff and Stanard Appraisal Service.																		
<b>2.</b>	<b>List the valuation group recognized in the County and describe the unique characteristics of each:</b>																		
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;"><u>Valuation Group</u></th> <th><u>Description of unique characteristics</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td>Bridgeport</td> </tr> <tr> <td style="text-align: center;">2</td> <td>Remainder of County</td> </tr> </tbody> </table>				<u>Valuation Group</u>	<u>Description of unique characteristics</u>	1	Bridgeport	2	Remainder of County									
<u>Valuation Group</u>	<u>Description of unique characteristics</u>																		
1	Bridgeport																		
2	Remainder of County																		
<b>3.</b>	<b>List and describe the approach(es) used to estimate the market value of commercial properties.</b>																		
	All three approaches (cost, income and sales) will be looked at, the market and income approaches will carry the most weight.																		
<b>3a.</b>	<b>Describe the process used to determine the value of unique commercial properties.</b>																		
	Stanard Appraisal Service has valued the unique commercial properties, such as the ethanol plant, feedlots, and elevator facilities and an independent living facility.																		
<b>4.</b>	<b>For the cost approach does the County develop the depreciation study(ies) based on the local market information or does the county use the tables provided by the CAMA vendor?</b>																		
	The appraisal company will look at the local market and surrounding counties to develop the depreciation studies.																		
<b>5.</b>	<b>Are individual depreciation tables developed for each valuation group? If not, do you adjust depreciation tables for each valuation group? If so, explain how the depreciation tables are adjusted.</b>																		
	Yes																		
<b>6.</b>	<b>Describe the methodology used to determine the commercial lot values.</b>																		
	From the market a square foot method has been developed.																		
<b>7.</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;"><u>Valuation Group</u></th> <th style="width: 20%;"><u>Date of Depreciation</u></th> <th style="width: 20%;"><u>Date of Costing</u></th> <th style="width: 20%;"><u>Date of Lot Value Study</u></th> <th style="width: 25%;"><u>Date of Last Inspection</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: center;">2020</td> <td style="text-align: center;">2020</td> <td style="text-align: center;">2017</td> <td style="text-align: center;">2017</td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: center;">2020</td> <td style="text-align: center;">2020</td> <td style="text-align: center;">2017</td> <td style="text-align: center;">2017</td> </tr> </tbody> </table>				<u>Valuation Group</u>	<u>Date of Depreciation</u>	<u>Date of Costing</u>	<u>Date of Lot Value Study</u>	<u>Date of Last Inspection</u>	1	2020	2020	2017	2017	2	2020	2020	2017	2017

## 2022 Agricultural Assessment Survey for Morrill County

<b>1.</b>	<b>Valuation data collection done by:</b>													
	Office staff.													
<b>2.</b>	<b>List each market area, and describe the location and the specific characteristics that make each unique.</b>													
	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%; text-align: center;"><u>Market Area</u></th> <th style="width: 70%; text-align: center;"><u>Description of unique characteristics</u></th> <th style="width: 20%; text-align: center;"><u>Year Land Use Completed</u></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">2</td> <td>The northern portion of the county which consists primarily of the Sandhills region.</td> <td style="text-align: center;">2017</td> </tr> <tr> <td style="text-align: center;">3</td> <td>This area begins at the escarpments and falls off into the valley and covers the remainder of Morrill County with the exception of the Platte River.</td> <td style="text-align: center;">2017</td> </tr> <tr> <td style="text-align: center;">4</td> <td>Market Area 4 is the area along the Platte River; it has recreational potential.</td> <td style="text-align: center;">ongoing</td> </tr> </tbody> </table>		<u>Market Area</u>	<u>Description of unique characteristics</u>	<u>Year Land Use Completed</u>	2	The northern portion of the county which consists primarily of the Sandhills region.	2017	3	This area begins at the escarpments and falls off into the valley and covers the remainder of Morrill County with the exception of the Platte River.	2017	4	Market Area 4 is the area along the Platte River; it has recreational potential.	ongoing
<u>Market Area</u>	<u>Description of unique characteristics</u>	<u>Year Land Use Completed</u>												
2	The northern portion of the county which consists primarily of the Sandhills region.	2017												
3	This area begins at the escarpments and falls off into the valley and covers the remainder of Morrill County with the exception of the Platte River.	2017												
4	Market Area 4 is the area along the Platte River; it has recreational potential.	ongoing												
	In 2014, the county started the physical review and inspection again. The cycle was completed in 2018 with the exception of the river. Is ongoing as new maps and sales come in.													
<b>3.</b>	<b>Describe the process used to determine and monitor market areas.</b>													
	Sales determination is made through sales review and verification, location and use of the property and a physical inspection if needed.													
<b>4.</b>	<b>Describe the process used to identify rural residential land and recreational land in the county apart from agricultural land.</b>													
	Recreational land is identified by the presence of blinds during an on-site inspection of suspected recreational areas.													
<b>5.</b>	<b>Do farm home sites carry the same value as rural residential home sites? If not what methodology is used to determine market value?</b>													
	Yes													
<b>6.</b>	<b>What separate market analysis has been conducted where intensive use is identified in the county?</b>													
	Standard Appraisers was previously used to help with the analysis of feed lots in the area. Feed lots are valued on a price per head based on the size and quality of the operation.													
<b>7.</b>	<b>If applicable, describe the process used to develop assessed values for parcels enrolled in the Wetland Reserve Program.</b>													
	Parcels enrolled in the Wetland Reserve Program have been mapped. The contracts are reviewed and those enrolled in the program will be valued at 100% of market. It is difficult to analyze Wetland Reserve market activity since there is not a large occurrence of these sales.													
<b>7a.</b>	<b>Are any other agricultural subclasses used? If yes, please explain.</b>													
	Yes, CRP, Irrigated Grass, and CREP subclasses are used.													
	<b><i><u>If your county has special value applications, please answer the following</u></i></b>													
<b>8a.</b>	<b>How many parcels have a special valuation application on file?</b>													

	135
<b>8b.</b>	<b>What process was used to determine if non-agricultural influences exist in the county?</b>
	Created market area 4 which runs along the Platte River.
	<i><b><u>If your county recognizes a special value, please answer the following</u></b></i>
<b>8c.</b>	<b>Describe the non-agricultural influences recognized within the county.</b>
	Hunting is the primary driving force in the marketing of these parcels in market area 4.
<b>8d.</b>	<b>Where is the influenced area located within the county?</b>
	Primarily along the Platte River.
<b>8e.</b>	<b>Describe in detail how the special values were arrived at in the influenced area(s).</b>
	Used influenced values from Ag land in and around market area 4 in comparison to the general agricultural market.

## MORRILL COUNTY

### 2021 PLAN OF ASSESSMENT

#### PLAN OF ASSESSMENT REQUIREMENTS:

Pursuant to §77-1311.02, on or before June 15<sup>th</sup> of each year, the assessor shall prepare a plan of assessment which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the county assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law, and the resources necessary to complete those actions. On or before July 31<sup>st</sup> of each year, the assessor shall present the plan to the county board of equalization and the assessor may amend the plan, if necessary, after the budget is approved by the county board. A copy of the plan and any amendments thereto shall be mailed to the Property Assessment Division of the Department of Revenue on or before October 31<sup>st</sup> of each year.

#### REAL PROPERTY ASSESSMENT REQUIREMENTS:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as “the market value of real property in the ordinary course of trade.”

Neb. Rev. Stat. §77-112

Assessment levels required for real property are as follows:

1. One hundred (100) percent of actual value for all classes of real property excluding agricultural and horticultural land;
2. Seventy-five (75) percent of actual value for agricultural land and horticultural land; and
3. Seventy-five (75) percent of special value as defined in §77-1343 and at its actual value when the land is disqualified for special valuation under §77-1347 for agricultural land and horticultural land which meets the qualifications for special valuation under §77-1344.

Neb. Rev. Stat. §77-201

**GENERAL DESCRIPTION OF REAL PROPERTY IN MORRILL COUNTY:**

Per the 2021 County Abstract, Morrill County consists of the following real property types:

	Parcel/Acre Count	% Parcel	Total Value	% Value	Land Value	Improvement Value
Residential	3235	36%	180,357,245	19%	21,997,055	158,360,190
Commercial/Ind	370	4%	47,430,475	4%	4,909,850	42,520,625
Agriculture	5183	59%	669,068,390	74%	559,669,875	109,398,515
TIF	10	.5%	21,785,630	2%	(Bs892,435)	(Ex20,893,195)
Minerals	92	.5%	1,136,755	1%	N/A	N/A
Total	8890	100%	919,778,495	100%	117,4071,54	310,279,330

Agricultural land is the predominant property type in Morrill County, with the majority consisting of grassland, primarily used for cow/calf operations.

Bridgeport continues to grow in with new business and residential homes. Bayard continues to struggle as businesses open, and then soon close due to lack of community support.

Additional information is contained in the 2021 Reports & Opinions, issued by the Property Assessment Division of the Department of Revenue, April 2021.

**CURRENT RESOURCES:**

Staff/Budget/Training

In addition to the Assessor, there is 1 Deputy Assessor, and 2 full-time clerks on staff. The county contracts with an independent appraiser (Stanard Appraisal), as needed, for appraisal maintenance and also with an oils/minerals appraiser (Pritchard & Abbot) for the oils in Morrill County. The year 2021 included another blanket increase for rural residential. The county board refuses to enter into a reval contract with Stanard Appraisal as the board feels the blanket increases fix values for good. Since this is the second year in a row for Rural Residential to receive a blanket increase, this proves otherwise.

The proposed budget for the assessment portion of the Assessor’s budget for FY 2021-2022 is going to be roughly \$245,465. The county has again agreed to a maintenance contract of appraisal through Stanard Appraisal. The Stanard Appraisal maintenance contract was agreed to 15 days in lieu of signing a contract to do a reval in the residential areas. The County Board expects the Assessor to take over all appraisal functions of the office. They feel that a contracted appraiser is a waste of taxpayer money, and she can do all valuation and appraisal work herself. It is prudent to note that a professional appraisal firm would be the best source of appraising and defending valuations on specialty and/or high dollar commercial properties. Bridgeport continues to be very economically successful in the last few years, even during the pandemic. Due to the economic success, the diversity of businesses across the county, and the lack of building permits from the rural area, the staff finds it very hard to keep up with all property to be assessed county wide without additional help from an appraiser.

By statute, the assessor must physically review and inspect all parcels every 6-years. The goal to complete the county 6-year review by the end of 2018 was met. Also, for the 2018 year, a review was completed on all commercial properties in the county. This included all feedlots.

The contract for Pritchard & Abbot continues for the years 2020 & 2021 for their services for oil appraisal in Morrill County.

The assessor believes continuing education is vital to maintaining proper assessment practices. The Assessor, Deputy Assessor, and staff try to attend as many monthly district meetings as possible, as well as workshops offered by the Nebraska Association of County Officials, the Property Assessment Division of the Department of Revenue and the International Association of Assessing Officers. With the budget cuts that seem to occur every year, it will become a challenge to keep 2 certified staff in the Morrill County Assessor's office as well as attend the educational IAAO classes and the expenses associated with each one. The Assessor carefully selects those courses that will most benefit the office. Both of the 2 staff that hold Assessor Certificates again completed 60 hours for this term that began in 2019. The year 2021 was hard to get great classes in due to the pandemic, and many courses becoming offered online. We are catching the hang of it, and will continue to pick and choose which courses will be attended online or in person.

#### Record Maintenance

The county board recognized the need for consistent maintenance of the records and approved the development of a web based GIS system through GWorks. Many appraisers, bankers, title agents, insurance agents, attorneys, and others have been appreciative of this information being available online alongside MIPS. A contract was agreed on by the board in 2017 and was signed with GWorks for 5 years of services remaining at the same cost each year. The County Board continues to question costs associated with this contract. The board even questions the mineral appraisal contracts.

New property record cards have been created for each real property parcel and this was finished in early 2019. Each property record card is filed by legal description and contains up-to-date listings, photographs and sketches for each property that has improvements. Pictures are continuously being added and updated as parcel reviews occur on each parcel that is improved. Morrill County Assessor's office is also adding situs addresses as the information is obtained on each parcel. This has been a help to local Law Enforcement, the Road Department, and the public in general. In 2017, the Assessor switched from Apex sketching to MIPS sketching

Morrill County utilizes software provided by MIPS for assessment and CAMA (computer assisted mass appraisal) administration. With the completion of development of the GIS system, this office has had the ability to maintain all records electronically and make them available via the Internet. All MIPS, CAMA & GWorks information can be found online. This has saved a substantial amount of time with phone calls and customers at the counter.

#### **ASSESSMENT PROCEDURES:**

##### Discover/List/Inventory Property

The assessor also keeps in close contact with the register of deeds and all zoning administrators of Morrill County, which is an aid in the process of property discovery. Data collection is done on a regular basis to

ensure listings are current and accurate. Utilization of the local FSA, NRCS, and NRD offices are also useful in tracking land usage if the landowner chooses to allow sharing of information. The Morrill County Zoning Board and Morrill County Board of Commissioners changed zoning regulations to not require surveys for parcels under 10 acres. This has created a hardship for the Assessor's Office in determining the exact location of the property and the Clerk's Office when accepting and recording deeds. Discovery by the Assessor and staff also aids in finding new improvements as zoning permits are not required by the Morrill County Zoning Board if the improvement is in the rural area. The only building permits the Assessor has received in the last several years have been from the cities of Bridgeport and Bayard. This last couple of years, the Clerk's office collected a few building permits & they alerted the Assessor's Office about them. The County Board has not held their Zoning Official responsible to get any building permits into the Assessor. Often improvements are discovered by the Assessor's Office during review and pickup work. With the Morrill County Zoning Board not requiring building permits or issuing any fines for not asking for a building permit on ag related improvements, all the rural improvements have been by discovery. The lack of building permits has made it more challenging for the Assessor's Office to find and list improvements as they are added to parcels in Morrill County. Rural residential, and rural commercial properties are never rezoned to their respective uses. Therefore, the Assessor codes into MIPS the use of the land in order to keep as valuation of those properties consistent.

### Ownership Changes

Morrill County processes more than five-hundred Real Estate Transfer Form 521's annually. These are filed on a timely basis with the Department of Assessment & Taxation. Standards of sales review from the International Association of Assessing Officers, Standard of Ratio Studies are adhered to.

### Data Collection

Morrill County Assessor's Office has implemented procedures to complete a physical routine inspection of all properties on a six-year cycle.

### Ratio Studies

Ratio studies are a vital tool in considering any assessment actions taken. Ratio studies are conducted internally to determine whether any assessment action is required in a specific area or class of property. Consultation with the field liaison is an important part of this process.

### Value Approaches

**Market Approach:** The market approach is used on all classes of property to obtain market value for each parcel of property. Sales comparison is the most common way to determine market value on similar properties.

**Cost Approach:** The cost approach is primarily used in the valuation process of residential and commercial properties. Marshall/Swift costing dated 2012 is used to arrive at Replacement Cost New (RCN). A depreciation factor derived from market analysis within the county is used to apply to the RCN to determine market value.

**Income Approach:** The income approach is primarily used in the valuation of commercial properties. Collection and analysis of income and expense data was completed in 2017 by the county's contracted appraiser.

Land valuation studies will be performed on an annual basis. A three-year study of arms-length transactions will be used to obtain current market values.

Reconciliation of Value

A reconciliation of the three approaches to value (if applicable) will be completed and documented.

Sales Ratio Review

Upon completion of assessment actions, sales ratio studies are reviewed to determine if the statistics are within the guidelines set forth by the state, including speaking with the buyer/seller if possible as well as sending out sales verification letters to all buyers/sellers of sales that are deemed arm length transactions.

Notices

Change of value notices are sent to the property owner of record no later than June 1<sup>st</sup> of each year as required by §77-1315. Prior to notices being sent, an article is published in the paper to keep taxpayers informed of the process. It has been helpful to also send a letter with the valuation changes explaining the process and why values changed for the current year.

**Level of Value, Quality and Uniformity for assessment year 2021:**

<u>Property Class</u>	<u>Ratio (Level of Value)</u>
Residential	94%
Commercial	100%
Agricultural	71%

For more information regarding statistical measures, see 2021 Reports & Opinions issued by the Property Assessment Division of the Department of Revenue, April 2021.

**Assessment Actions Planned for Assessment Year 2021:**

**Residential:** The assessor will continue to monitor and review the urban and suburban residential parcels within the county to determine if there are changes in the market that would require a change in assessment for an area, subclass or neighborhood. Statistical studies will be completed to determine if ratios are reflecting values with appropriate uniform and proportionate assessments. Appraisal maintenance and pick-up work will be completed in addition to sales review. With the blanket increase for the second year in a row in Rural Residential, it is planned to complete a reval in both in Rural Residential. The SW portion of Morrill County was reviewed in 2020, and in 2021, the area around Bridgeport and to the east was reviewed for 2022 valuations.

**Commercial:** The assessor will continue to monitor and review the commercial parcels within the county to determine if there are changes in the market that would require a change in assessment since a complete review was completed in 2017. A physical inspection will continue on all portions of commercial properties. Statistical studies will be completed to determine if ratios are reflecting values with

appropriate uniform and proportionate assessments. Appraisal maintenance and pick-up work will be completed in addition to sales review.

**Agricultural:** A market analysis of agricultural sales by land classification group will be conducted to determine what adjustments, if any, need to be made to comply with statistical measures. Land usage will be tracked through shared information from the local NRD and FSA offices. Improved agricultural sales will be monitored through ratio studies. Appraisal maintenance and pick-up work will be completed in addition to sales review. As part of the 6-year review plan, it is anticipated to complete another portion of around the Bayard area of Morrill County in the year 2022, as a large portion in the middle of Morrill County was reviewed in 2021. LCG changes were already made in accordance with 2019 LB 372 that was passed, and these will continue to be monitored.

#### **Assessment Actions Planned for Assessment Year 2022:**

**Residential:** The assessor will continue to monitor and review the urban and suburban residential parcels within the county to determine if there are changes in the market that would require a change in assessment for an area, subclass or neighborhood. Statistical studies will be completed to determine if ratios are reflecting values with appropriate uniform and proportionate assessments. The portion around Bayard, and to the northeast will be reviewed as part of the 6-year plan. Appraisal maintenance and pick-up work will be completed in addition to sales review.

**Commercial:** The assessor will continue to monitor and review the commercial parcels within the county to determine if there are changes in the market that would require a change in assessment. All commercial was completely reviewed for 2018 as part of the 6-year plan. A physical inspection will continue on portions of commercial properties. Statistical studies will be completed to determine if ratios are reflecting values with appropriate uniform and proportionate assessments. Appraisal maintenance and pick-up work will be completed in addition to sales review.

**Agricultural:** A continued physical inspection of all ag-improved parcels within a portion of the county will be completed by the assessor and/or contract appraiser. A market analysis of agricultural sales by land classification group will be conducted to determine what adjustments, if any, need to be made to comply with statistical measures. Land usage will be tracked through shared information from the local NRD and FSA offices. Improved agricultural sales will be monitored through ratio studies. As part of the 6-year review plan, it is anticipated to complete the west central portion of the county which may include areas that are heavily populated (Bayard). Also, it is planned to study and implement values for pivot irrigation differently than gravity irrigation. The 2020 protest season brought in several protests showing a true difference between the two types of irrigation in sales. This will take some time, and review specifically by the Assessor who is versed in irrigated farm practices.

#### **Assessment Actions Planned for Assessment Year 2023:**

**Residential:** The assessor will continue to monitor and review the urban and suburban residential parcels within the county to determine if there are changes in the market that would require a change in assessment for an area, subclass or neighborhood. Statistical studies will be completed to determine if ratios are reflecting values with appropriate uniform and proportionate assessments. The NW and possibly into the north central portion of Morrill County will be reviewed as part of the 6-year plan. Appraisal maintenance and pick-up work will be completed in addition to sales review. The towns of Bridgeport and Bayard need to be considered if time allows.

**Commercial:** The assessor will continue to monitor and review the commercial parcels within the county to determine if there are changes in the market that would require a change in assessment. All commercial was completely reviewed for 2018 as part of the 6-year plan. A physical inspection will continue on portions of commercial properties. Statistical studies will be completed to determine if ratios are reflecting values with appropriate uniform and proportionate assessments. Appraisal maintenance and pick-up work will be completed in addition to sales review. It is anticipated to start

**Agricultural:** A continued physical inspection of all ag-improved parcels within a portion of the county will be completed by the assessor and/or contract appraiser. Farmsites are included as part of the rural residential to prevent additional travel times to far areas of the county. A market analysis of agricultural sales by land classification group will be conducted to determine what adjustments, if any, need to be made to comply with statistical measures. Land usage will be tracked through shared information from the local NRD and FSA offices. Improved agricultural sales will be monitored through ratio studies. As part of the 6-year review plan, it is anticipated to complete the east central and possibly start the NW portion of Morrill County.

**Other functions performed by the assessor's office, but not limited to:**

Form 521 Filing with the Department of Revenue Property Assessment Division: Upon receipt of the Form 521, the county assessor will enter the sale information from the completed Form 521 into the county computer assisted mass appraisal (CAMA) system. This entry will ensure the property information in the county sales file is current. The county assessor must then forward the scanned copy of the original Form 521 to the Tax Commissioner on or before the fifteenth of the second month following the month the deed was recorded.

Permissive Exemptions: Review annual filings of applications for new or continued exempt use and make recommendation to county board. This office receives approximately 35 applications annually. The year 2020 was a new application year. All applications were reviewed. 2021 is a reaffirmation year.

Homestead Exemptions: Review annual filings of applications; process approvals and denials; send denial notifications to applicants no later than July 31; prepare and send applications to Department of Revenue no later than August 1 annually. This office receives approximately 290 applications annually. The year 2021 brought the online submission of applications, and the Assessor and staff worked diligently to make sure this was a smooth process for the first year.

Homestead Exemption Tax Loss Report: Compile tax loss due to Homestead Exemptions and report no later than November 30 annually-Form 458X.

Personal Property Schedules: Review annual filings of agricultural and commercial schedules. This office receives almost 800 personal property schedules annually. The Assessor's Office has also been tracking new businesses and farmers by 521's and also the advertisements in local media. Several new personal property returns were started this way.

Special Valuation Applications: The assessor continues to research river ground and if a parcel should no longer be agricultural, it will lose the Special Valuation. There may be 1-2 new applications annually, in which the assessor takes time to go review those parcels, and make that decision based upon agricultural uses.

Cemetery Report to the Board: Reports Cemeteries and land to the County Board.

Form 45 County Abstract of Assessment for Real Property and Assessed Value Update: Compile all real property valuation information and report no later than March 19 annually.

Change of Value Notification: Notification sent no later than June 1 annually to all property owners whose value changed from the prior year.

Protests: The Assessor's Office meets with as many protesters as possible and reviews all protested properties prior to the protest hearing in order to provide the County Board of Equalization with the most recent and updated data available before making any value changes. As of 2019 with the new form 425, the assessor will have to go review for BOE decisions for each following year to be able to reassess.

Tax List Corrections: Prepare tax list corrections documents for County Board of Equalization review.

County Personal Property Abstract: To prepare an abstract of the property assessment rolls of locally assessed personal property of the county on forms prescribed and furnished by the Tax Commissioner. The county assessor shall electronically file the abstract with the Property Tax Administrator on or before July 20 of each year.

Taxable Value and Growth Certifications: Total assessments for real, personal and centrally assessed properties are reported to all political subdivisions no later than August 20 annually.

School District Taxable Value Report: Final report of taxable value for all school districts located within the county to be filed no later than August 25 annually.

Annual Inventory Statement: Report of all personal property in possession of this office to be filed with the County Board by August 31 annually.

Average Residential Value Report: Certification of the average residential value for Homestead Exemption purposes filed no later than September 1 annually.

Three Year Plan of Assessment: Assessment plan detailing the next three years that must be prepared by June 15 annually, submitted to the County Board of Equalization no later than July 31 annually and filed no later than October 31 annually.

Certify values: By August 20th every year, values are certified to every taxing entity within Morrill County.

Tax List: Certification of the tax list, for both real and personal property within the county, which must be delivered to the treasurer no later than November 22 annually.

Certificate of Taxes Levied: Final report of the total taxes to be collected by the county to be filed no later than December 1 annually.

Government Owned Properties Report: Report of taxable and exempt state or governmental political subdivision owned properties to be filed for the year 2004 and every 4<sup>th</sup> year thereafter no later than December 1 annually.

**Conclusion:**

The Morrill County Assessor makes every effort to comply with state statute and the rules and regulations of the Department of Property Assessment and Taxation to attempt to assure uniform and proportionate assessments of all properties in Morrill County.

Considering the broad range of duties this office is responsible for, it is anticipated that there will always be a need for the services of a contract appraiser. Since budgetary concerns exist, it is the goal of the Morrill County Assessor's Office to complete as much appraisal work as possible. The Assessor's Office has completed as much data collection as possible. Standard Appraisal has been used only for high end or specialty properties. Morrill County Assessor's Office takes pride in the steps they have taken to get information more accurate and complete than it has ever been and then made more readily available to the public, especially online services, often times showing customers at the counter how to access and utilize these services.

Lastly, it is a high priority that this office makes every effort to promote good public relations and keep the public apprised of the assessment practices required by law.

Respectfully submitted,

Rose M. Nelson  
Morrill County Assessor

Ruth A Sorensen  
Dept of Revenue, Property Assessment Division  
1033 O St. Ste 600  
Lincoln, NE 68508

Dear Ms Sorensen:

Below is the information regarding special valuation in Morrill County as per PAT Regulation-11-005.04.

Market area 4 is the area located around the North Platte River which runs diagonally from the northwesterly corner of Morrill County to the Southeasterly corner. This area is unique in that it was developed off of the top two soils surrounding the river and accretion ground in 2010. Land values are affected by buyers purchasing the land for recreational use.

Market area 3 is the rocky hills coming down into the river and Market area 2 is the rest of Morrill County. Market area 1 was dissolved into Market area 2 as there were not enough sales to constitute it being its separate area. Neither Market area 2 or 3 has special valuation.

Morrill County developed Special Value in Market area 4 in 2013. In each three year sales period, we generally have a very small number of land sales along the North Platte River. However, the sales that have occurred show that the accretion land values are affected by buyers purchasing the land for recreational use.

Letters were initially sent out to all owners of accretion ground to explain how to apply for special value with Form 456 in this market area, as there are owners in this area actively using their land for agricultural use, primarily pasture for cattle. The assessor and her deputy went out and inspected all parcels that special value was applied for, and continue the same process as new applications come in. In most instances, there were cattle put on accretion lands at some point every year. This was proven through parcel owners showing fencing, Russian Olive trees removed, and in some instances at the time of inspection there were cattle grazing on the grass. However, there are recreational uses going on. The most primary of these is goose hunting. There is also duck hunting, deer hunting, and turkey hunting. It was decided then to plot each of these blinds on our GWorks mapping system and place a one acre recreational value on each blind.

There have been very few new applications in the last couple years. It is felt that most lands that would qualify for special value have been applied for. The assessor and her deputy or staff will continue to go out and inspect and document recreational uses on each parcel. The blinds will be

valued at 100% of market value, with the rest of the land valued as agricultural, if used as such, and is based on approximately 75% of market.

These are the methods Morrill County uses to determine valuations for agriculturally used properties and for recreationally used properties. We feel it is the most equitable and uniform method of dealing with recreational uses along the North Platte River in Morrill County.

Sincerely,

Rose M Nelson  
Morrill County Assessor
