

Good Life. Great Service.

DEPARTMENT OF REVENUE

# 2023 REPORTS AND OPINIONS OF THE PROPERTY TAX ADMINISTRATOR

**BROWN COUNTY** 

DEPARTMENT OF REVENUE

April 7, 2023

Commissioner Keetle :

The Property Tax Administrator has compiled the 2023 Reports and Opinions of the Property Tax Administrator for Brown County pursuant to <u>Neb. Rev. Stat. § 77-5027</u>. This Report and Opinion will inform the Tax Equalization and Review Commission of the level of value and quality of assessment for real property in Brown County.

The information contained within the County Reports of the Appendices was provided by the county assessor pursuant to <u>Neb. Rev. Stat. § 77-1514</u>.

For the Tax Commissioner

Sincerely,

Realt A. Sorensen

Ruth A. Sorensen Property Tax Administrator 402-471-5962

## Introduction

Pursuant to <u>Neb. Rev. Stat. § 77-</u>5027 the Property Tax Administrator (PTA) shall annually prepare and deliver to each county assessor and to the Tax Equalization and Review Commission (Commission) the Reports and Opinions (R&O). The R&O contains statistical and narrative reports informing the Commission of the certified opinion of the PTA regarding the level of value and the quality of assessment of the classes and subclasses of real property in each county. In addition, the PTA may make nonbinding recommendations for class or subclass adjustments to be considered by the Commission.

The statistical and narrative reports in the R&O provide an analysis of the assessment process implemented by each county to reach the levels of value and quality of assessment required by Nebraska law. The PTA's opinion of the level of value and quality of assessment in each county, is a conclusion based upon all the data provided by the county assessor and information gathered by the Nebraska Department of Revenue, Property Assessment Division (Division) regarding the assessment activities in the county during the preceding year.

The statistical reports are developed using the statewide sales file that contains all transactions as required by <u>Neb. Rev. Stat. § 77-1327</u>. From this state sales file, a statistical analysis comparing assessments to sale prices for arm's-length sales (assessment sales ratio) is prepared. After analyzing all available information to determine that the sales represent the class or subclass of real property being measured, inferences are drawn regarding the level of assessment and quality of assessment of that class or subclass of real property. The statistical reports contained in the R&O are developed based on standards developed by the International Association of Assessing Officers (IAAO).

The analysis of assessment practices in each county is necessary to give proper context to the statistical inferences from the assessment sales ratio studies and the overall quality of assessment in the county. The assessment practices are evaluated in the county to ensure generally accepted mass appraisal techniques are used and that those methods will generally produce uniform and proportionate valuations.

The PTA considers the statistical reports and the analysis of assessment practices when forming conclusions for both the level of value and quality of assessment. The consideration of both the statistical indicators and assessment processes used to develop valuations is necessary to accurately determine the level of value and quality of assessment. Assessment practices that produce a biased sales file will generally produce a biased statistical indicator, which, on its face, would otherwise appear to be valid. Likewise, statistics produced on small, unrepresentative, or otherwise unreliable samples, may indicate issues with assessment uniformity and assessment level – however, a detailed review of the practices and valuation models may suggest otherwise. For these reasons, the detail of the PTA's analysis is presented and contained within the Residential, Commercial, and Agricultural land correlations of the R&O.

### Statistical Analysis:

Before relying upon any calculated statistical measures to evaluate the assessment performance of the county assessor, the Division teammates must evaluate whether the statistical sample is both representative of the population and statistically reliable.

A statistically sufficient reliable sample of sales is one in which the features of the sample contain information necessary to compute an estimate of the population. To determine whether the sample of sales is sufficient in size to evaluate the class of real property, measures of reliability are considered, such as the coefficient of dispersion (COD) or the width of the confidence interval. Generally, the broader the qualitative measures, the more sales will be needed to have reliability in the ratio study.

A representative sample is a group of sales from a larger population of parcels, such that statistical indicators calculated from the sample can be expected to reflect the characteristics of the sold and unsold population being studied. The accuracy of statistics as estimators of the population depends on the degree to which the sample represents the population.

Since multiple factors affect whether a sample is statistically sufficient, reliable, and representative, single test thresholds cannot be used to make determinations regarding sample reliability or representativeness.

For the analysis in determining a point estimate of the level of value, the PTA considers three measures as indicators of the central tendency of assessment: the median ratio, weighted mean ratio, and mean ratio. The use and reliability of each measure is based on inherent strengths and weaknesses which are the quantity and quality of the information from which it was calculated and the defined scope of the analysis.

The median ratio is considered the most appropriate statistical measure to determine a level of value for direct equalization, which is the process of adjusting the values of classes or subclasses of property in response to an unacceptable required level of value. Since the median ratio is considered neutral in relationship to either assessed value or selling price, adjusting the class or subclass of properties based upon the median measure will not change the relationships between assessed value and level of value already present in the class of property. Additionally, the median ratio is less influenced by the presence of extreme ratios, commonly called outliers, which can skew the outcome in the other measures.

The weighted mean ratio best reflects a comparison of the fully assessable valuation of a jurisdiction, by measuring the total assessed values against the total of selling prices. The weighted mean ratio can be heavily influenced by sales of large-dollar property with extreme ratios.

The mean ratio is used as a basis for other statistical calculations, such as the Price Related Differential (PRD) and Coefficient of Variation (COV). As a simple average of the ratios, the mean ratio has limited application in the analysis of the level of value because it assumes a normal

distribution of the data set around the mean ratio with each ratio having the same impact on the calculation regardless of the assessed value or the selling price.

The quality of assessment relies in part on statistical indicators as well. If the weighted mean ratio, because of its dollar-weighting feature, is significantly different from the mean ratio, it may be an indication of disproportionate assessments. Assessments are disproportionate when properties within a class are assessed at noticeably different levels of market value. The coefficient produced by this calculation is referred to as the PRD and measures the assessment level of lower-priced properties relative to the assessment level of higher-priced properties. The PRD range stated in IAAO standards is 98% to 103%. A perfect match in assessment level between the low-dollar properties and high-dollar properties indicates a PRD of 100%. The reason for the extended range on the high end is the recognition by IAAO of the inherent bias in assessment. The IAAO Standard on Ratio Studies notes that the PRD is sensitive to sales with higher prices even if the ratio on higher priced sales do not appear unusual relative to other sales, and that small samples, samples with high dispersion, or extreme ratios may not provide an accurate indication of assessment regressivity or progressivity, appraisal biases that occur when high-value properties are appraised higher or lower than low-value properties in relation to market values.

The Coefficient of Dispersion (COD) is a measure also used in the evaluation of assessment quality. The COD measures the average absolute deviation calculated about the median and is expressed as a percentage of the median. A COD of 15% indicates that half of the assessment ratios are expected to fall within 15% of the median. The closer the ratios are grouped around the median the more equitable the property assessments tend to be.

Nebraska law does not provide for a range of acceptability for the COD or PRD; however, the IAAO Standard on Ratio Studies establishes the following range of acceptability for the COD:

| General Property Class  | Jurisdiction Size/Profile/Market Activity                                     | COD Range   |
|---|---|-------------|
| Residential improved (single family                           | Very large jurisdictions/densely populated/newer properties/active markets    | 5.0 to 10.0 |
| dwellings, condominiums, manuf.<br>housing, 2-4 family units) | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 15.0 |
|   | Rural or small jurisdictions/older properties/depressed market areas          | 5.0 to 20.0 |
| Income-producing properties (commercial,                      | Very large jurisdictions/densely populated/newer properties/active markets    | 5.0 to 15.0 |
|   | Large to mid-sized jurisdictions/older & newer properties/less active markets | 5.0 to 20.0 |
| industrial, apartments,)                                      | Rural or small jurisdictions/older properties/depressed market areas          | 5.0 to 25.0 |
|   | Very large jurisdictions/rapid development/active markets                     | 5.0 to 15.0 |
| Residential vacant land                                       | Large to mid-sized jurisdictions/slower development/less active markets       | 5.0 to 20.0 |
|   | Rural or small jurisdictions/little development/depressed markets             | 5.0 to 25.0 |
|   | Very large jurisdictions/rapid development/active markets                     | 5.0 to 20.0 |
| Other (non-agricultural) vacant land                          | Large to mid-sized jurisdictions/slower development/less active markets       | 5.0 to 25.0 |
|   | Rural or small jurisdictions/little development/depressed markets             | 5.0 to 30.0 |

A COD under 5% indicates that the properties in the sample are either unusually homogenous, or possibly indicative of a non-representative sample due to the selective reappraisal of sold parcels. The IAAO utilizes varying upper bounds for the COD range to recognize that sample size, property type, variation of property ages and market conditions directly impact the COD. This chart and the analyses of factors impacting the COD are considered to determine whether the calculated COD is within an acceptable range. The reliability of the COD can also be directly affected by extreme ratios.

The confidence interval is another measure used to evaluate the reliability of the statistical indicators. The PTA primarily relies upon the median confidence interval, although the mean and weighted mean confidence intervals are calculated as well. While there are no formal standards regarding the acceptable width of such measure, the range established is often useful in determining the range in which the true level of value is expected to exist. Pursuant to <u>Neb. Rev.</u> <u>Stat. §77-5023</u>, the acceptable range is 69% to 75% of actual value for agricultural land, except for taxes levied to pay school bonds passed after January 12, 2022 for which the acceptable range is 44% to 50% of actual value. For all other classes of real property, the acceptable range is 92% to 100% of actual value.

### Analysis of Assessment Practices:

A review of the assessment practices that ultimately affect the valuation of real property in each county is completed. This review is done to ensure the reliability of the statistical analysis and to ensure generally accepted mass appraisal techniques are used to establish uniform and proportionate valuations. The review of assessment practices is based on information provided by the county assessors in Assessment Surveys and Assessed Value Updates (AVU), along with observed assessment practices in the county.

To ensure county assessors are submitting all Real Estate Transfer Statements, required for the development of the state sales file pursuant to <u>Neb. Rev. Stat. §77-1327</u>, a random sample from the county registers of deeds' records is audited to confirm that the required sales have been submitted and reflect accurate information. The timeliness of the submission is also reviewed to ensure the sales file allows analysis of up-to-date information. The sales verification and qualification procedures used by the county assessors are reviewed to ensure that sales are properly considered arm's-length transactions unless determined to be otherwise through the verification process. Proper sales verification practices ensure the statistical analysis is based on an unbiased sample of sales.

Comparison of valuation changes on sold and unsold properties is conducted to ensure that there is no bias in the assessment of sold parcels and that the sales file adequately represents the population of parcels in the county.

Valuation groups and market areas are also examined to identify whether the groups and areas being measured truly represent economic areas within the county. The measurement of economic areas is the method by which the PTA ensures intra-county equalization exists. The progress of the county assessor's six-year inspection and review cycle is documented to ensure compliance with <u>Neb. Rev. Stat. § 77-1311.03</u> and also to confirm that all property is being uniformly listed and described for valuation purposes.

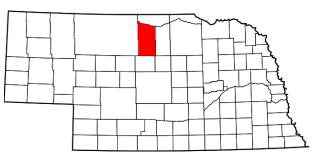

Valuation methodologies developed by the county assessor are reviewed for both appraisal logic and to ensure compliance with generally accepted mass appraisal techniques. Methods and sales used to develop lot values, agricultural outbuildings, and agricultural site values are also reviewed to ensure the land component of the valuation process is based on the local market and economic area. Compliance with statutory reporting requirements is also a component of the assessment practices review. Late, incomplete, or excessive errors in statutory reports can be problematic for property owners, county officials, the Division, the Commission, and others. The late, incomplete, or excessive errors in statutory reporting highlights potential issues in other areas of the assessment process. Public trust in the assessment process demands transparency, and assessment practices are reviewed to ensure taxpayers are served with such transparency.

Comprehensive review of assessment practices in each county is conducted throughout the year. When practical, if potential issues are identified, they are presented to the county assessor for clarification and correction, if necessary. The county assessor can then work to implement corrective measures prior to establishing assessed values. The PTA's conclusion that assessment quality either meets or does not meet generally accepted mass appraisal techniques is based on the totality of the assessment practices in the county.

\*Further information may be found in Exhibit 94

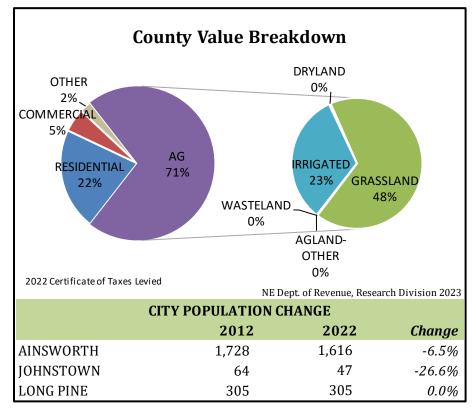

## **County Overview**

With a total area of 1,221 square miles, Brown County has 2,908 residents, per the Census Bureau Quick Facts for 2021, a slight population decline from the 2020 U.S. Census. Reports indicate that 80% of county residents are homeowners and 83% of residents occupy the same residence as in the prior year (Census

Quick Facts). The average home value is \$90,259 (2022 Average Residential Value, Neb. Rev. Stat. § 77-3506.02).

The majority of the commercial properties in Brown County are located in and around Ainsworth, the county seat. According to the latest information available from the U.S. Census Bureau, there are 138 employer establishments with total employment of 932, a 4% decrease from 2019.

Brown County's valuation base is comprised mostly bv agricultural land. Grassland makes up a majority of the land in the county, with irrigated land contributing to a significant portion of the valuation base. Brown County is included in both the Middle Niobrara and Upper Loup Natural Resources Districts (NRD).

#### Assessment Actions

Ainsworth residential was increased by 15%. Long Pine City was increased by 5%. The county assessor increased the second price break of a tiered pricing structure on rural recreational land from \$6000 to \$8000. Each price break on rural residential was increased by \$1000. General maintenance and pick-up work was completed and placed on the assessment rolls.

#### Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

All arm's-length sales were examined to determine if the sales qualification and verification processes made all qualified sales available for measurement. The usability rate for residential sales is above the statewide average. Comments and reasons for disqualification are documented by the county assessor.

The six-year inspection and review cycle is current in Brown County. A copy of the three-year plan of assessment detailing the assessment actions planned in the county was reviewed. The five valuation groups consist of Ainsworth, Johnstown, Long Pine, Rural Recreational, and Rural Residential.

The process that was started by the previous county assessor of reclassifying agricultural land that had recreational influence that resulted in 220 additional parcels in the residential rural recreation assessor location, remains to be completed by the new county assessor. A full and complete valuation methodology needs to be completed as well as a parcel-by-parcel examination to determine that all parcels have been correctly identified so that the property owners can understand the property valuations and assessment practices.

#### Description of Analysis

There are 128 qualified sales during the study period which are divided into five valuation groups for analysis.

| Valuation Group | Description |
|-----------------|-------------|
| 1               | Ainsworth   |
| 2               | Johnstown   |
| 3               | Long Pine   |
| 4               | Rural Rec   |
| 5               | Rural Res   |

The statistical profile demonstrates a median of 94%, a weighted mean of 86% and a mean of 98%. The qualitative statistics are a COD of 26% and a PRD of 114%. The sales when arrayed by incremental dollar value ranges does not demonstrate a regressive pattern. When all qualified and non-qualified sales are used for a trimmed analysis where the outlier medians below 50% and above 150% are removed, the COD improves to 20%.

When the sales are stratified into the valuation groups, all the valuation groups have a median within the acceptable range except for Valuation Group 2 which has insufficient sales for statistical reliability. Valuation Groups 1, 4, and 5 all present high PRDs at 114%, 118% and 105% respectively. Valuation Group 1 sales arrayed by the incremental dollar values does not display a completely regressive pattern. A trimmed analysis does not improve the PRD but does lower the COD to 20%. Valuation Group 4 does not display a regressive pattern when sales are arrayed neither does Valuation Group 5 which with the lowest dollar sale removed has a PRD in the acceptable range.

A comparison of the value change in the 2023 County Abstract of Assessment, Form 45 Compared with the 2022 Certificate of Taxes Levied Report (CTL) reflects the assessment actions reported by the county assessor.

### Equalization and Quality of Assessment

A review of all available information indicates values are uniform and the quality of assessment for the residential class of property complies with generally accepted mass appraisal techniques.

| VALUATION GROUP |       |        |        |          |       |        |
|-----------------|-------|--------|--------|----------|-------|--------|
| RANGE           | COUNT | MEDIAN | MEAN   | WGT.MEAN | COD   | PRD    |
| 1               | 85    | 94.30  | 98.86  | 86.94    | 25.36 | 113.71 |
| 2               | 4     | 120.62 | 137.25 | 116.28   | 26.29 | 118.03 |
| 3               | 15    | 93.30  | 95.50  | 102.59   | 19.76 | 93.09  |
| 4               | 11    | 94.71  | 92.51  | 78.30    | 39.00 | 118.15 |
| 5               | 13    | 91.84  | 92.07  | 87.62    | 22.43 | 105.08 |
| ALL             | 128   | 94.37  | 98.43  | 86.05    | 26.17 | 114.39 |

### Level of Value

Based on analysis of all available information, the level of value for the residential property in Brown County is 94%.

#### **Assessment Actions**

A 5% economic depreciation decrease was implemented on improvements. General maintenance and pick-up work was completed and entered on the assessment rolls.

#### Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

The commercial review process included examining the three approaches to value. Due to the small number of commercial sales, the sales comparison approach is less than reliable. Likewise, the lack of income data renders the income approach unviable. The cost approach is the only realistic approach to value.

The sales qualification and verification process review indicate that acceptable practices are utilized in verifying and qualifying sales. The usability rate for the commercial class is consistent with the statewide average.

One valuation group is deemed sufficient for the analysis of commercial sales. With the prior year review and inspection of the commercial class, the county assessor meets the six-year inspection and review cycle requirement.

#### Description of Analysis

The commercial statistical profile consists of 13 commercial sales with a median of 111%. The COD and PRD are 36% and 114% respectively. The median is heavily influenced by two high ratio sales when removed lowers the median to 102%. However, the COD remains high at 30% indicating dispersion remains in the data and the median is not a reliable indicator of value. An array of the sales by incremental dollar ranges, reveals the pattern of the medians does not display a regressive pattern.

The review of the assessment practices of the county assessor is the used to determine a market level of value for Brown County given the unpredictability of the sales and the low volume of sales that are available for analysis. Lake Mac Appraisals completed a reappraisal of the commercial class for the previous year.

The comparison of the abstract by assessor location notes a 11% difference in the Ainsworth assessor location but most of the difference is accounted for by one parcel. A review of the 2023 County Abstract of Assessment for Real Property, Form 45, compared with the 2022 Certificate of Taxes Levied Report (CTL) support that the values were uniformly applied to the commercial class and accurately reflect the assessment actions by the county assessor.

#### Equalization and Quality of Assessment

The low number of sales and the dispersion of the sample preclude setting a level of value based on the sales. However, the statistical review with the support of the assessment practices suggests that assessment within the county is valued within the acceptable range and are therefore considered equalized. The quality of assessment of the commercial class in Brown County complies with generally accepted mass appraisal techniques.

#### Level of Value

Based on analysis of all available information, the level of value for the commercial property in Brown County is determined to be at the statutory level of 100% of market value.

#### Assessment Actions

Parcels designated with water values were decreased to \$400/acre.

#### Assessment Practice Review

As explained in the Introduction of this Report and Opinion, the assessment practices were reviewed to determine compliance with all assessment requirements and to ensure that all data submitted to the State sales file was timely and accurate.

An examination of the sales roster was conducted to determine if the sales qualification and verification process were adequately providing qualified sales available for analysis. The review found sufficient reasons for disqualification of sales and that the overall usability rate was higher than the statewide average.

Only one market area is used for the analysis of the agricultural land sales in Brown County. Grassland on sandy soils is the predominate soil in the county. Identification of agricultural intensive use parcels has not been utilized in the analysis of agricultural parcels.

With the new county assessor coming into office, the status to recognize the recreational influences around the Niobrara river and various creeks and tree covered areas was reviewed. The analysis to date has confirmed that influences are present, and a methodology needs to be fully developed and implemented. The analysis confirmed that a total parcel by parcel land review needs to be conducted to ensure that all rural residential, recreational and agriculture parcels are being classified in a transparent and documented method. Work will continue with the new county assessor in establishing sound practices that improve the uniformity of assessment.

#### Description of Analysis

The statistical profile consists of 29 qualified agricultural sales during the three-year study period with a median of 72%. Examination of the sales by 80% Majority Land Use (MLU) shows 12 irrigated land sales with a median of 73% while 15 grassland sales with a median of 69%.

| 80%MLU By Market Area |       |        |       |          |       |        |
|-----------------------|-------|--------|-------|----------|-------|--------|
| RANGE                 | COUNT | MEDIAN | MEAN  | WGT.MEAN | COD   | PRD    |
| Irrigated             |       |        |       |          |       |        |
| County                | 12    | 73.06  | 76.12 | 71.70    | 18.97 | 106.16 |
| 1                     | 12    | 73.06  | 76.12 | 71.70    | 18.97 | 106.16 |
| Grass                 |       |        |       |          |       |        |
| County                | 15    | 69.08  | 78.22 | 75.15    | 38.43 | 104.09 |
| 1                     | 15    | 69.08  | 78.22 | 75.15    | 38.43 | 104.09 |
| ALL                   | 29    | 72.41  | 77.07 | 74.15    | 27.28 | 103.94 |

Brown County's grassland values are just slightly above the average values of bordering counties while dryland is above the average values of surrounding counties but not the highest among the counties. Irrigated land in Brown County continues to be higher than surrounding counties but the sales continue to support the valuation.

The 2023 County Abstract of Assessment for Real Property Form 45 Compared with the 2022 Certificate of Taxes Levied Report (CTL) reflects the reclassification of parcels and the assessment actions of the county assessors and further supports completing the process of developing a transparent valuation methodology.

### Equalization and Quality of Assessment

Equalized valuation appears to be demonstrated in the outbuildings of the agricultural class. The assessment practice review and the general trends in the agricultural economy indicate that most agricultural land values are assessed uniformly.

Based on the continuing concerns first discovered in the 2021 valuations and the new county assessor not having time to develop and fully implement the practices of a sound valuation methodology to properly classify all parcels within the county, the quality of assessment for the agricultural class of property does not comply with generally accepted mass appraisal techniques.

#### Level of Value

Based on analysis of all available information, the level of value of agricultural land in Brown County cannot be determined.

#### Special Valuation Level of Value

Based on analysis of all available information, the level of value the special valuation of agricultural land in Brown County cannot be determined.

## 2023 Opinions of the Property Tax Administrator for Brown County

My opinions and recommendations are stated as a conclusion based on all of the factors known to me regarding the assessment practices and statistical analysis for this county. See, Neb. Rev. Stat. § 77-5027 (R.R.S. 2011). While the median assessment sales ratio from the Qualified Statistical Reports for each class of real property is considered, my opinion of the level of value for a class of real property may be determined from other evidence contained within these Reports and Opinions of the Property Tax Administrator. My opinion of quality of assessment for a class of real property may be influenced by the assessment practices of the county assessor.

| Class                                     | Level of Value  | Quality of Assessment                                       | Non-binding recommendation |
|---|---|---|----------------------------|
| Residential Real<br>Property              | 94  | Meets generally accepted mass appraisal techniques.         | No recommendation.         |

#### Soils

#### CLASS

Excesssive drained sandy soils formed in alluvium in valleys and eolian sand on uplands in sandhills

Excessively drained sandy soils formed in eolian sands on uplands in sandhills

Moderately well drained silty soils on uplands and in depressions formed in loess

Well drained silty soils formed in loess on uplands

Well drained silty soils formed in loess and alluvium on stream terraces

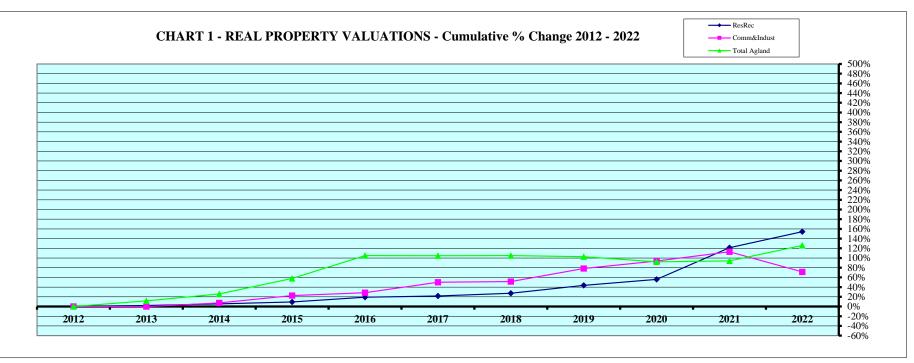

Well to somewhat excessively drained loamy soils formed in weathered sandstone and eolian material on uplands

Somewhat poorly drained soils formed in alluvium on bottom lands

Moderately well drained silty soils with clay subsoils on uplands

### A. Staffing and Funding Information

| 1.  | Deputy(ies) on staff:  |
|-----|--|
|     | None   |
| 2.  | Appraiser(s) on staff:   |
|     | None   |
| 3.  | Other full-time employees:   |
|     | Two  |
| 4.  | Other part-time employees:   |
|     | None   |
| 5.  | Number of shared employees:  |
|     | None   |
| 6.  | Assessor's requested budget for current fiscal year:   |
|     | \$144,350  |
| 7.  | Adopted budget, or granted budget if different from above:   |
|     | \$144,350  |
| 8.  | Amount of the total assessor's budget set aside for appraisal work:  |
|     | N/A  |
| 9.  | If appraisal/reappraisal budget is a separate levied fund, what is that amount:  |
|     | \$10,000   |
| 10. | Part of the assessor's budget that is dedicated to the computer system:  |
|     | \$23,780 which is not part of the assessor's budget comes from the Finance/Administrative Budget and is dedicated to the computer system and is shared with the Treasurer. |
| 11. | Amount of the assessor's budget set aside for education/workshops:   |
|     | \$1000   |
| 12. | Amount of last year's assessor's budget not used:  |
|     |  |

### B. Computer, Automation Information and GIS

| 1.  | Administrative software:  |
|-----|---|
|     | MIPS  |
| 2.  | CAMA software:  |
|     | MIPS  |
| 3.  | Personal Property software:   |
|     | MIPS  |
| 4.  | Are cadastral maps currently being used?                                  |
|     | Yes   |
| 5.  | If so, who maintains the Cadastral Maps?                                  |
|     | Assessor and Staff  |
| 6.  | Does the county have GIS software?  |
|     | Yes   |
| 7.  | Is GIS available to the public? If so, what is the web address?           |
|     | Yes, Brown.gworks.com   |
| 8.  | Who maintains the GIS software and maps?                                  |
|     | Assessor, Staff and gWorks  |
| 9.  | What type of aerial imagery is used in the cyclical review of properties? |
|     | gWorks  |
| 10. | When was the aerial imagery last updated?                                 |
|     | 2020  |
|     |   |

### **C. Zoning Information**

| 1. | Does the county have zoning?     |
|----|----------------------------------|
|    | Yes                              |
| 2. | If so, is the zoning countywide? |
|    |                                  |
|    | Yes                              |

| 3. | What municipalities in the county are zoned? |  |  |  |
|----|--|--|--|--|
|    | Ainsworth and Long Pine                      |  |  |  |
| 4. | When was zoning implemented?                 |  |  |  |
|    | 1993, updated in 2021                        |  |  |  |

### **D. Contracted Services**

| 1. | Appraisal Services:  |
|----|--|
|    | Some services are contracted out – In house reviews/revaluations are done as well. |
| 2. | GIS Services:  |
|    | gWorks   |
| 3. | Other services:  |
|    | None   |

# E. Appraisal /Listing Services

| 1. | List any outside appraisal or listing services employed by the county for the current assessment year |  |  |  |  |
|----|---|--|--|--|--|
|    | Yes, outside appraisal services may be used.  |  |  |  |  |
| 2. | If so, is the appraisal or listing service performed under contract?                                  |  |  |  |  |
|    | Yes   |  |  |  |  |
| 3. | What appraisal certifications or qualifications does the County require?                              |  |  |  |  |
|    | Meet the qualifications of the NE Real Property Appraiser Board.                                      |  |  |  |  |
| 4. | Have the existing contracts been approved by the PTA?   |  |  |  |  |
|    | Yes   |  |  |  |  |
| 5. | Does the appraisal or listing service providers establish assessed values for the county?             |  |  |  |  |
|    | Contracted appraiser provides a value subject to assessor's opinion.                                  |  |  |  |  |

# 2023 Residential Assessment Survey for Brown County

| 1.       | Valuation da  | aluation data collection done by:   |  |  |  |  |
|----------|---|---|--|--|--|--|
|          | The Assessor  | and Staff do most of the data collection. Outside appraisal services will be used as needed.  |  |  |  |  |
| 2.       | List the valuation group recognized by the County and describe the unique characteristics of each:  |   |  |  |  |  |
|          | Valuation<br>Group  | Description of unique characteristics   |  |  |  |  |
|          | 1   | Ainsworth is all improved and unimproved properties located within the City limits.<br>Ainsworth is the largest community in Brown County, population approximately 1,728.<br>The public school system is located in town as well as a variety of jobs, services, and goods.  |  |  |  |  |
|          | 2   | Johnstown is all improved and unimproved properties located within the Village limits. The population is approximately 64 and is 10 miles west of Ainsworth. The village consists of a post office, small tavern with eating facilities and a store that sells gifts, antiques, etc.  |  |  |  |  |
|          | 3   | Long Pine is all improved and unimproved properties located within the City limits. The population is approximately 305 and is 10 miles to the east of Ainsworth. The City contains a post office, grocery store, tavern with eating facilities, lumberyard, feed and grain business and a store with gifts/antiques. There is also the Legion Club, Masonic Temple and Senior Center. Across the HWY from Long Pine is the Pine Valley Resort which consists of cabins for rent. |  |  |  |  |
|          | 4   | Rural Rec consists of parcels located in the Hidden Paradise area which is located in the Long Pine city suburban zoning jurisdiction. Also the Clear Lake area which is improvements on leased land, located south of Ainsworth approximately 20 miles.  |  |  |  |  |
|          | 5   | Rural Res is all improved and unimproved properties outside the city limits of Ainsworth and Long Pine.   |  |  |  |  |

# BROWN COUNTY ASSESSOR

148 West 4<sup>th</sup> Suite 6 Ainsworth, Nebraska 69210 assessor@browncountyne.org Phone: 402-387-1621 Fax: 402-387-1621

#### 2022 3-YEAR PLAN OF ASSESSMENT

### TERRI J. VAN HOUTEN, BROWN COUNTY ASSESSOR

#### June 1, 2022

### INTRODUCTION: 77-1311.02 (the new law as written in LB334)

Pursuant to Neb. Laws 2007, LB334, Section 64, on or before June 15 each year, the assessor shall prepare a plan of assessment, which describes the assessment actions planned for the next assessment year and two years thereafter. The plan shall indicate the classes or subclasses of real property that the county assessor plans to examine during the years contained in the plan of assessment. The plan shall describe all the assessment actions necessary to achieve the levels of value and quality of assessment practices required by law and the resources necessary to complete those actions. On or before July 31 each year, the assessor shall present the plan to the county board of equalization and the assessor may amend the plan, if necessary, after the county board approves the budget. A copy of the plan and any amendments thereto shall be mailed to the Department of Revenue on or before October 31 each year.

#### REAL PROPERTY ASSESSMENT REQUIREMENTS:

All property in the State of Nebraska is subject to property tax unless expressly exempt by Nebraska Constitution, Article VIII, or is permitted by the constitution and enabling legislation adopted by the legislature. The uniform standard for the assessed value of real property for tax purposes is actual value, which is defined by law as "the market value of real property in the ordinary course of trade." Neb.Rev.Stat. 77-112 (reissue 2003).

#### Assessment levels required for real property are as follows:

- 1. 92-100% of actual value for all classes of real property excluding agricultural and horticultural land;
- 2. 69-75% of actual value for agricultural land and horticultural land; and
- 3. 69-75% of special value for agricultural and horticultural land which meets the qualifications for

special valuation under 77-1344.

New Property: For assessment year 2023, an estimated 46 building permits and/or information statements were either valued for new property construction/additions in the county or looked at for additional reasons.

#### CURRENT RESOURCES:

#### A. BUDGET, STAFFING & TRAINING:

#### Proposed Budget

2022-2023 Assessor Budget = \$147,350.00 (Increase of salaries only) 2022-2023 Co. Appraisal Budget = \$20,200 (Inc. GWORKS Program) As reported last year we have values table driven in the office so we don't need the same budget as before. Therefore, we are able to cut this substantially. In the past, it was valued for that year only and not entered in the system always.

2022-2023 Computer Hardware/Software Budget = \$28,370 (1/2 Shared Budget w/Treasurer for Internet, CAMA and IT, as well as the Treasure's printed items for taxes) <u>Staff</u>

1 County Assessor

2 Full-time Clerks (35 Hrs. per Week)

#### Training

The assessor attends monthly District Meetings Spring & Fall Assessor Workshops, and takes various educational courses to keep updated on assessment & appraisal knowledge and to obtain the required 60-hour requirement of certified education for maintaining the assessor's certificate. The assessor strives to keep updated on legislation that affects her

09 Brown Page 54

office. Information is then passed on to the staff for additional knowledge in the process of the assessment responsibility. It would be a positive thing to be able to send the staff for additional educational courses. At this point, most of the training for them has been "hands on" from the assessor herself.

The assessor has been working with the staff to learn legal descriptions, which they previously did not know. In addition to this, she has been training on splits, sales, and various other areas so the office is more fluid on days off and in the event, the assessor would not be able to perform the responsibilities. I think this is important to overlap in the even someone is not able to perform their duties

#### B. Cadastral Maps & GIS Mapping:

Brown County's cadastral maps have a photo base that was taken in 1989. The assessor's office is now using the GIS aerial map with a 2018 photo base from GWORKS to determine the number of acres in each soil type as well as drawing out the land use of that soil type. Aerial oblique photos of the farm sites that were taken in the 2019-20 year. These were reviewed and MANY parcels had improvements that have never been assessed. These were added to the 2021 tax roll. The assessor's office identified IOLL's throughout the county on GWORKS. This is continually updated. In 2021 the tax districts, fire districts, school districts and the NRD's were added as a layer on GWORKS to assist the staff and tax payers in seeing the different tax areas.

#### C. Property Record Cards:

We have a historical file of PRC's that we will keep up with ownership, splits and combinations of parcels. PRC's are kept for the 6 years as recommended by the state records retention. Electronic records are replacing the paper copies to save time and resources.

#### D. Computer Software:

Brown County is contracted with MIPS for the software that is used in the assessment administration and the CAMA (appraisal) administration. GIS mapping software has been administered in Brown County through GWORKS.

#### E. World Wide Web:

We provide up to date information via the world wide web on all information regarding each parcel. This includes one photo and one sketch. The current ownership and other parcel changes are updated each business night.

In 2021, I, Terri Van Houten, requested that the sales no longer be available with a subscription, but instead open to the public at no cost. This was approved and the use has

09 Brown Page 55

increased immensely! We have had a lot of positive feedback on it! Appraisers, other assessors, realtors and taxpayers all use this data.

#### CURRENT ASSESSMENT PROCEDURES FOR REAL PROPERTY:

#### A. Discover, List & Inventory Property:

Real estate transfer statements are brought to the assessor's office whenever the clerk's office has finished their responsibility with the form. Ownerships are then changed on the hard copy property record cards as well as the electronic cards that are involved in the legal description that is on the transfer statements. The electronic ownerships are changed through the sale file. Sales review of each transfer are done through a sales verification process of sending a questionnaire out to the buyer and seller to determine if the transaction is a bona-fide arms-length sale.

Two towns in Brown County are required through city regulations to obtain building permits for new construction. They are then shared with the assessor's office. Brown County, itself, does not require building permits in the rural for farm buildings (which includes the farmhouse) but zoning permits are required for non-farm buildings. A request has been made to the zoning administrator that they do an information statement for anything built to keep a better record of what is being erected. Those permits are filed in the clerk's office and brought to the assessor by the zoning administrator. Information statements are filed with the assessor for some construction that takes place in the county but the assessor's office works very diligently & actively to take notice of all things that they might hear or know of to pick up for new assessments. Frequently, the assessor sends out information statements to the property owner to obtain that information or it would not get added to the tax roll in the valuation process as far as the filing process described in Statute 77-1318.01. All new construction is added to the tax roll on an annual basis as it is discovered.

#### **B.** Data Collection:

Brown County works with a process of a systematic inspection & review by class or subclass of property on a 6-year cycle (Statute 77-1311.03) to determine if a revaluation is required of that class or neighborhood. When working with a total revaluation, a market analysis is first done. If income data is necessary & can be obtained, it & any other necessary data is obtained by a contract appraisal company or the assessor's office.

#### C. Ratio Studies:

Ratio studies are performed on an annual basis on all classes of property to determine whether assessment actions are needed in a specific area or neighborhood or in the entire class of property throughout the county. The county works with the field liaison assigned to their county by the state at all times.

#### D. Value Approaches:

1) Market Approach: The market approach is used on all classes of property to attempt to obtain market value on each parcel of property. Using sales comparisons is one way of determining market value on like properties.

2) Cost Approach: The cost approach is used primarily in the residential and commercial valuation process. Brown County currently is using a Marshall/Swift cost manual dated June 2022 to arrive at a Replacement Cost New (RCN) calculation to start with. A depreciation factor derived from the market analysis data in the county is then used to apply to that RCN to arrive at market value. The goal for the assessor's office is have all properties in the county based off the June 2018 costing program.

3) Income Approach: The income approach is used primarily in the valuation of commercial properties. Income & expense data collection is done through the market.

4) Land Valuation Studies: These studies are done on an annual basis in Brown County. A three-year study period of arms-length sales is used to determine current market values. Currently, Brown County consists of only one market area.

#### E. Reconciliation of Value:

The reconciliation represents the three approaches (if used) to value property. The electronic file has the capability of showing it if the three approaches are used on that parcel.

#### F. Sales Ratio Review:

After new valuation procedures are finished, another sales ratio study is done to determine the statistics on that class of property. This is done to determine if the median and quality statistics are in compliance with the required statistics.

#### G. Notices:

Notices of valuations that change, either increase or decrease, are sent out to the property owner as required by Statute 77-1315 on an annual basis. Generally, a letter of explanation for a change in value is inserted by the assessor.

#### Level of Value, Quality, and Uniformity for assessment year 2022:

| Property Class    | Median  |
|-------------------|---------|
| Residential       | NEI     |
| Commercial        | 100.00% |
| Agricultural Land | NEI     |

\*COD means coefficient of dispersion and PRD means price related differential.

\*\*NEI means not enough information to determine level of value.

For more information regarding statistical measures, see 2022 Reports & Opinions or Findings & Orders of the Nebraska Tax Equalization & Review Commission for the 2022 yr.

#### Assessment Actions Planned for Assessment Year 2023:

<u>Residential</u>: Ainsworth, Long Pine and Johnstown need driveway paving picked up as we have some driveways we know about and not others. We have not assessed them, as we want to be fair. Ainsworth will need a complete review with photos and a check of actual sizes since this was not done in the past. The sizes were only guestimated. Values will need to be revalued with a new depreciation model as the sales have changed in Ainsworth and Johnstown. Update Ainsworth to 2023 costing. Johnstown could have the updated costing to avoid this for 2024. COD's and PRD's will need tightened down.

<u>Agricultural</u>: Ratio studies will be completed to determine if value increases or decreases need to take place to be in compliance with statue requirements. Sale verifications will be continued as usual to determine arms-length transactions.

As I spoke with tax payers through out 2022 we discussed that land in Southern Brown County is not selling as high currently compared to the land in Northern Brown County. They are very much still affected from the 2019 Cyclone Bomb in the Southern areas. I also brought this up during CBOE meetings that grass in the North part of Brown County sells higher than the grass in Southern Brown County. There is a significant difference in soils throughout the county as well. In the current market, I feel it would be fair to the Southern taxpayers to have their own market area so they are not affected by the higher sales of the Northern region. This was discussed in the CBOE meeting and the commissioners though this a great idea as well. This will bring the Northern values up, as they will not be pulled down by the Southern Brown sales. There is other influence such as distance to town, etcetera that affect values as well.

It was discussed by the CBOE to give a percent off for all "wet" or "moist" soil types to avoid working with each taxpayer who is currently under water as we have done over the last 4 years. This is the first year the CBOE had to go through the formal protest of the 422 as we have worked through the process in the assessor's office and presented them to the board in the past. I do not feel this would equalize the values as there are wet or moist soils that are producing crops in the drought this year while other areas are burning up. There will be new maps out for 2022 on GWORKS for next year and it will be even easier to see where water continues to stand from the 2019 Cyclone Bomb. It takes time, but it is fair to the taxpayers that they not pay for these areas they currently cannot use. On the flip side, the areas that are getting extra crops this year due to the wot/moist soil should not be given a break next year based on adjustments suggested.

<u>Commercial</u>: These properties will be monitored for compliance after the valuation grouping review for the 2023 tax year. Narrow the gap on the COD and PRD's.

Assessment Actions Planned for Assessment Year 2024

09 Brown Page 58

<u>Residential</u>: Sales verifications will be reviewed as well as current sales to keep up to date with house values based on the 3 years of sales. Review Long Pine, Johnstown and Rural Recreation with all new photos and pick-up work not reported to us before. Update them to 2024 costing. Long Pine and Johnstown will need paved driveways added as they have not been in the past.

<u>Agricultural</u>: Ratio studies will be completed to determine if value increases or decreases need to take place to be in compliance with statue requirements. Sale verifications will be continued as usual to determine arms-length transactions.

<u>Commercial</u>: These properties will be monitored for compliance after the valuation grouping review for the 2024 tax year. Attempt to narrow the gap on the COD and PRD's.

#### Assessment Actions Planned for Assessment Year 2025

<u>Residential</u>: Sales verifications will be reviewed as well as current sales to keep up to date with house values based on the 3 years of sales. Review rural residential with all new photos and pick-up work not reported to us before. Update rural residential to 2025 costing.

<u>Agricultural</u>: Ratio studies will be completed to determine if value increases or decreases need to take place to be in compliance with statue requirements. Sale verifications will be continued as usual to determine arms-length transactions.

<u>Commercial</u>: These properties will be monitored for compliance after the valuation grouping review for the 2025 tax year. Attempt to narrow the gap on the COD and PRD's.

#### Other Functions Performed by Assessor's Office, but not limited to:

#### Assessor & Staff Responsibilities

The following reports and documents are mandated for the assessor's office throughout the calendar year to be filed timely to meet the requirements of legislative law:

<u>Permissive Exemptions</u>: Approximately 46 (plus 2 applications going for approval in June) Tax Exempt Organizations filed for property tax exemption for the 2022 year by December 30, 2021. Administer annual filings of applications for new or continued exempt use, review and make recommendations to county board.

<u>Homestead Exemptions</u>: <u>Approximately 174</u> Homestead Exemption Applications were filed in Brown Co. by June 30<sup>th</sup> last year. For 2022, we already have 189. This is up from the 154 that I looked back at before I was in office. Administer annual filings of applications, approval/denial process, taxpayer notifications, and taxpayer assistance. This is up 35! We constantly have people coming of age and dying, so this is great that we got the word out and have more approved!

<u>Homestead Exemption Tax Loss Report</u>: Report filed by Nov. 30<sup>th</sup> in conjunction with the treasurer for tax loss in Brown County due to loss of tax dollars reimbursed by state to county.

<u>Personal Property Schedules</u>: <u>Approximately</u> 529 Personal Property Schedules were filed in Brown Co. Administer annual filings of schedules; prepare subsequent notices for incomplete filings or failure to file and penalties applied, as required.

<u>Form 45 County Abstract of Assessment for Real Property</u>: All Real Estate values are accumulated by March 19<sup>th</sup> after an enormous amount of detailed work in determining market value on all classes of property in Brown County.

<u>Sales Information</u>: Send to PAD rosters & annual Assessed Value Update w/abstract by March 19<sup>th</sup>.

<u>Notice of Valuation Change</u>: These forms are sent to all property owners whose value has either decreased or increased by June 1<sup>st</sup> based on Statute 77-1315.

<u>Tax List Corrections</u>: Prepare tax list correction documents for county board approval. <u>County Bd. Of Equalization</u>: Attend all County Board of Equalization meetings for valuation protests - assemble and provide information on all protests (June 1<sup>st</sup> - July 25<sup>th</sup>) <u>TERC Appeals</u>: Prepare information and attend taxpayer appeal hearings before TERC, defend valuation.

<u>TERC Statewide Equalization</u>: Attend hearings if applicable to county, defend values and/or implement orders of the TERC.

<u>Centralized Assessments</u>: Data for 8 Centralized Assessment companies located in Brown County is reviewed as certified from the Property Assessment Division of The Department of Revenue for public service entities, establish assessment records and tax billing for tax list. There are 3 gas companies and 5 telephone companies within the county.

<u>Value Certifications</u>: Real Estate, Personal Property & Centralized Company assessments are accumulated & certified to 12 political subdivisions and 5 school districts for levy setting purposes by August 20th.

<u>School District Taxable Value Report</u>: The values for the School Districts are accumulated together in this final report to be sent to the Property Tax Administrator by August 25<sup>th</sup>. <u>Annual Inventory Statement</u>: This report designating personal property located in the Assessor's Office must be reported to County Board by August 25<sup>th</sup>.

<u>Average Residential Value for Homestead Exemption</u>: Assessor must determine this value and certify to Department of Revenue by September 1<sup>st</sup>.

<u>Annual Plan of Assessment</u>: Pursuant to LB 263 Section 9, the assessment plan is formed & written on or before June 15 each year and submitted to the County Bd. of Equalization on or before July 31 and to the Property Tax Administrator on or before October 31 of each year.

<u>Tax Districts & Tax Rates</u>: Management of school district and other tax entity boundary changes necessary for correct assessment and tax information. Input/Review of tax rates used for tax billing process. Implement LB126 Class I School District Merger requirements.

<u>Tax List</u>: The tax list is prepared and certified to the county treasurer for real property, personal property and centrally assessed property by November 22<sup>nd</sup>.

<u>CTL (Certificate of Taxes Levied)</u>: This is the final report for the calendar year which is the total taxes collected in the county for tax year. It has a deadline date of December 1<sup>st</sup> and sent to the Property Tax Administrator.

<u>Education</u>: Assessor and/or Appraisal Education – attend meetings, workshops and educational classes to obtain required hours of continuing education to maintain assessor certification.

<u>Disaster Relief</u>: The County Assessor will receive Disaster Relief Appeal forms and revalue the home, commercial building or land based on how it is used as well as ability to be used Prior to July 1 of each year. (This was new in 2019)

Throughout the calendar tax year, the assessor's office continuously updates records with the transfer of ownership of property from the 521 Transfer Statements that are filed at the County Clerk's office. Many requests for information by real estate brokers, insurance companies, mortgage companies, appraisers, bankers, etc. are attended to on a daily basis with the telephone or at the counter. Records are continually updated with new data such as address changes, etc. Splits and combination of records are made as required daily. Information for those changes will be kept updated on the GIS program.

#### Contract Appraiser

Brown County does not hire a contract appraiser on an annual basis, only on a "as needed basis". The assessor and staff list & value the appraisal maintenance or "new construction work" annually from the numerous building permits, information statements or other resource means of new construction. Contracted appraisal work will be required for future projects.

#### CONCLUSION:

The Brown County Assessor, Terri Van Houten & her staff, Peggy Graham and Taylor Stang work diligently to comply with state statute and the rules and regulations of the Property Assessment Division of The Department of Revenue to attempt to assure uniform and proportionate assessments of all properties in Brown County. In the last 3.5 years all rural properties as well as commercial properties have been measured to assure they are the correct size now that we are assessing based on square foot, quality and condition of the buildings. We found that many of the buildings were not put on the tax roll and the ones that were on, roughly one third had the incorrect size. We have went through the PRC's to make sure all the site improvements are in the correct area, the improvements the home are in the correct area, etc. In 2020, I narrowed down the tax districts based on actual districts, not districts from the past. All parcels have values that are table driven. Homes are from 2021 values. Commercial are for 2022 with a new depreciation table. Commercial properties were gone through by Bryan Hill and I. They were to be left alone at that time. Graham has went through these and made adjustments so they may not match the values set as they were at the time of values. We narrowed down the neighborhoods further based on

09 Brown Page 61

sales of commercial. We have the PRC for the time of valuation. Depreciation tables were established based on sales for all areas of the market. Depreciation tables were made and applied with the help of Bob Lilly. Curtis Stephen said we were good on residential and not to change Ainsworth, so these were removed. Johnstown had 4 sales. Rural recreational had 6 sales. Rural had 7 sales. So, these were ruled NEI as Johnstown was out, however the state says we need 10 or more sales to see a trend. Johnstown just a major revaluation 2 years ago to get to where we are. The R&O states we had a 332% increase in Rural Rec in 2021. This is true and is reflective of the sales. The "what if not statement" to TERC shows how far we would be off if this was not done. The 2021 R&O states that what was done was needed. For 2022 there were shifts in value including but not limited to: changing the feedlots to agriculture versus commercial as we were advised to do, adding a greenbelt area to see where they values fall as well as take in 456 forms to level out this area due to high sales. The state said they did not have the time to review all of this and was not able to determine a level of value for this year. Sarah Scott with the state called and said I am not in trouble and there is no issue, but they were not going to set a value for 2022. TERC reviewed this and made observations in many counties that were much further out on their PRD's than Brown County and they had many more sales than Brown County. TERC used one example that had over 100 sales that was still out. TERC did not make any recommendation nor did the State. The data will be in a much more uniform form for next year and years beyond where everything will be based on Marshall and Swift costing, year built, guality and condition. I feel that the work done in the last 3.5 years will make it much better for Brown County to be able to do the bulk of the work in-house instead of needing an appraiser unless there is a unique property. Marshall and Swift costing books were purchased to refer to for quality on the buildings. Then it would need assistance for one year only if we did have that unique building. From there on the values would be set based on the depreciation model and not hand entered percentages. Quality and condition would be kept up with the 6year review.

2023 Methodology for Special Valuation

For Brown County, Nebraska

The Brown County Assessor's Office submits this report to the Department of Revenue Property Assessment Division pursuant to REG-11-005-0040. The influence identified as Recreational.

Brown County is currently studying this for 2023 so this in progress. Once this is complete, I will get more details filled in for the year. Still compiling the sales in Brown County to determine the influence of recreation on agriculture in the county. The previous assessor for Brown County was looking into the areas along creeks and the river in regards to this to determine the influence of recreation on agriculture in the county.

#### Market Areas-

Brown County has one market area identified where the whole county is included. Currently looking into what is best moving forward.

#### Identification-

Currently looking into identifying recreational influence in the Calamus River, Niobrara River, Plum Creek, Bone Creek, Long Pine Creek as well as those areas with trees and ponds.

#### Agricultural Values-

Values are placed on Agricultural or horticultural properties using uninfluenced comparable sales away from the areas. After viewing sales, the Brown County Assessor's Office will determine if there is a need for a separate market area for recreational along the creeks, rivers, ponds, and tree area associated with them. The recreational influence may effect tree subclasses. At this time, the agricultural value or special value will be valued as grass within the market area.

#### **Qualified Properties-**

There was a lot of parcels that were identified for the special valuation area. There are currently 10 marked in the system to show they qualify for special valuation marked by the previous assessor. We will review others as they are received.
